Seeing is believing.

Innovative technology improves visibility in both dark & light states – to help you weld with confidence.
See your work in a brand new light.

The new auto-darkening filter kit for the 3M™ Speedglas™ Welding Helmet Series 9100 is your window to a new world of more realistic color and detail – to help you weld, grind and see your finish.

With improvements based on input from master welders around the world, the 3M™ Speedglas™ Welding Filter 9100XXi sets a new standard for visibility, convenience and ease of use.

“The view seems lighter and less green – I can see colors far better! Even in the dark state, I see contours better.”
A new level of visibility and control

Improved optics deliver more natural color and contrast, which may allow:

- Better control of the weld puddle with a view that appears lighter, brighter and more realistic
- Greater precision with set-up and finishing operations
- Simplified workflow with convenient, “gloves-on” memory mode switching – plus a clearer view of welding machine controls

See the difference!

Improved optics in the new 3M™ Speedglas™ Welding Filter 9100XXi provide more contrast and natural-looking color, as shown by these photos.

Key Features

Fast Switching Between Welding & Grinding

One touch of an external button lets you switch between welding mode and shade 3 grinding mode.

Easy Upgrade

The 9100XXi ADF is compatible with all welding helmets in the 3M™ Speedgas™ Welding Helmet Series 9100. However, to access the grinding and memory modes, the silver front panel included in the 3M™ Speedgas™ Auto-Darkening Filter Kit 9100XXi is required. This panel will only operate on Speedgas Welding Helmets 9100, 9100-Air and 9100-QR.

New Memory Modes

Push the external button for 2-3 seconds to access one of your two preset welding modes. Both memory modes have an individual setting for dark shade, light-to-dark switching sensitivity, and dark-to-light delay.

Instant-On

“Grab and Go” feature automatically turns the welding filter on to your last welding setting whenever you pick up the helmet. Automatically shuts down after a period of inactivity.

3M™ Speedglas™ Welding Filter 9100XXi

- Viewing area: 2.87 x 4.21 in. (73 x 107 mm)
- Battery life time: 1800 hours
- Battery type: CR2032 (Lithium 3V)
- Classification: 1 / 1 / 1 / 2
- Light state: Shade 3
- Dark states: Shades 5, 8, 9–13
- Fail-safe Shade: Shade 5
- UV/IR Protection: Shade 13 protection in all states
- Delay (dark-to-light): Adjustable from 40 to 800 ms
- Grinding state: Shade 3
