**Esthetic Restoration Solution**

**A beautiful smile  
she can't wait to share.**

A young woman with long, dark, wavy hair and black-rimmed glasses is smiling broadly. She is holding a smartphone up to take a selfie. She is wearing a white lace-trimmed top with a red strap over her shoulder and a colorful beaded necklace. She has several shopping bags, including a red one and a brown paper one, hanging from her shoulders. The background is a blurred outdoor setting with buildings and trees. A large white triangle is overlaid on the right side of the image.

# Because you want every patient to leave with a beautiful smile.

Patients love the way highly polished restorations look and feel. But creating a high-end, natural-looking gloss can take more of your valuable time. So what do you do ... sacrifice higher esthetics for higher productivity? Or spend the extra time to create a beautiful smile ... because, "that's just the way it is?"

The days of time-consuming esthetic restorations are gone. With our Esthetic Restoration Solution, you'll love how simple it is to create natural-looking restorations with a gorgeous paste-like gloss.

Oh, don't be surprised if word of your great work gets around ... because a beautiful smile is worth sharing.

The truth is, the composite you use matters. You can spend a lot of time polishing most composites, only to find the initial gloss doesn't last long.

Or, you can create smiles your patients will love by using our Esthetic Restoration Solution. Thanks to 3M's nanotechnology, Filtek™ Z350 XT Universal Restorative is easy to polish and also offers unsurpassed polish retention.

Plus, nanotechnology makes Filtek Z350 XT restorative beautifully strong, giving you the option of using it in any place and for any Class.

Having one restorative that can do it all is a beautiful thing.

Class I

Class II

Class III

Class IV

Class V

## Nanotechnology. For beautifully strong restorations ... anywhere.

# Diamond particles. For a gorgeous, paste-like gloss.

The esthetic appearance of a restoration depends on the shade, shape and the gloss achieved by final polishing.

With the 3M™ ESPE™ Sof-Lex™ Diamond Polishing System, you can get a gorgeous, diamond paste-like gloss—with the convenience of a rubberized system!

The Sof-Lex™ Pre-Polishing Spiral (beige) smooths and removes scratches in restorations that develop during contouring and prepares the surface for high-gloss polishing. The Sof-Lex™ Diamond Polishing Spiral (pink) delivers the final high-gloss polish.

You'll find it reassuring to know that you no longer need to stop and switch between traditional points, cups, discs and brushes. The flexible spirals adapt to all tooth surfaces—anterior and posterior, convex and concave. They can be sterilized and reused, making them an economical choice for your practice.

## A difference you can see!

Enhance® Finishing System  
and PoGo® Polishing System

Notice a clearer reflection when  
Filtek™ Z350 XT Universal Restorative is  
polished with the Sof-Lex™ Diamond Polishing System.

# Now simple esthetics can be as easy as 1, 2, 3 ...

A factor in the success of this solution is 3M's unprecedented history in abrasive technologies. We leveraged that expertise to create a polishing solution that can help you maximize the esthetic benefits of Filtek™ Z350 XT Universal Restorative with ease and simplicity.
