

# Lower Profile Higher Comfort

The lowest profile system just got lower.

- ① Slots on posterior brackets are, on average, 60% closer to tooth for greater patient comfort
- ② In most cases, the new Low Profile Brackets have become flatter without compromising the ability to ligate
- ③ Moving the wire closer to the tooth reduces the lever arm, leading to better biomechanics

■ Archwire

● Low Profile Incognito<sup>™</sup> Appliance System Bracket

● Incognito<sup>™</sup> Appliance System Bracket

Every innovation which increases patient comfort is an additional argument to provide an Incognito<sup>™</sup> Appliance to my patients.
