**Ketac-Cem® ApliCap®/MaxiCap® Technique**

**Step 1:**
Remove provisional restoration.

**Step 2:**
Thoroughly clean preparation with water.

**Step 3:**
Gently dry preparation. Do not over dry.

**Step 4:**
Dry the restoration with air.

**Step 5:**
Activate the capsule for 2 seconds and triturate for 10 seconds.

**Step 6:**
Place a thin, even layer of cement on inner surface of restoration. Do not use the mixture if it has lost its gloss.

**Step 7:**
Seat the restoration without pressure.

**Step 8:**
Remove excess.
Glass ionomer cement in Aplicap/Maxicap capsules for single crowns, bridges, inlays, posts and more.

**INDICATIONS**
- Crown and bridge cementation
- Inlay cementation
- Post and screw cementation
- Orthodontic bands
- Cavity lining

**ADVANTAGES**
- Available in Aplicap/Maxicap capsules for predictable setting characteristics
- Capsule form provides uniform consistency of materials
- Easy, direct application for asepsis
- Fluoride releasing
- Bonds to enamel and dentin for reduced microleakage
- Biocompatibility increases patient acceptance
- Extremely low film thickness optimizes fit and marginal integrity
- Excellent physical properties allow use for long span bridge work
- Radiopaque
