

IAD in the Acute Setting

Moving Prevention Forward

Incontinence-Associated Dermatitis (IAD)

Do you have a program that effectively reduces the risk of skin damage?

1 KNOW the Prevalence/Incidence of incontinence and IAD in your care setting

2 RECOGNIZE the Impact IAD has on a patient's quality of life

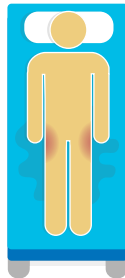

What is IAD?

Incontinence-associated dermatitis describes the skin damage associated with exposure to urine or stool. It causes considerable discomfort and can be difficult, time consuming and expensive to treat.²

Patients are at the center of this condition. IAD can cause discomfort, pain, burning or itching in the affected areas.

Other issues IAD can cause include:

- Undue burden of care
- Loss of independence
- Disruption in activities
- Sleep disturbance
- Reduced quality of life

Assessing the Skin

All patients with urinary and/or fecal incontinence should have their skin assessed regularly to check for signs of IAD. Best Practice Principles recommend adoption of a categorization tool to consistently document skin injury.³

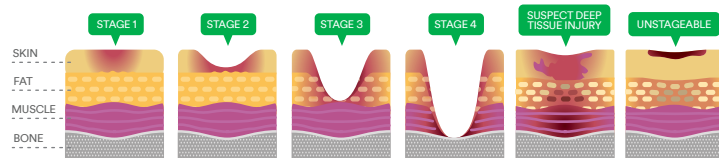

AT RISK	MILD	MODERATE-SEVERE
No redness and skin intact Skin is normal as compared to rest of body (no signs of IAD)**	Category 1 – Red* but skin intact Erythema** +/- edema**	Category 2 – Red* with skin breakdown +/- vesicles/bullae/skin erosion** +/- denudation of skin** +/- skin infection** +/- edema**

* Or paler, darker, purple, dark red or yellow in patients with darker skin tones. ** If the patient is not incontinent, the condition is not IAD.

Pressure Ulcers

Incontinence is a well-recognized risk factor for the development of pressure ulcers^{3,4} which can cause patients suffering and increase the costs of health care.

Prevention of avoidable pressure ulcers and IAD is a clear indicator of the quality of patient care.

3 UNDERSTAND how IAD can Impact total cost of care

4 SEE the Cost Benefits of implementing a structured skin care regimen

Two Key Pathways for Prevention and Management of IAD³

ONE

Manage Incontinence

- Assess and treat reversible causes
- Optimize nutrition, fluid management and toileting techniques
- Implement pressure ulcer prevention plan

TWO

Implement a structured skin care regimen

CLEANSE

PROTECT

RESTORE

5 SHOW Impact of Implementing an IAD prevention protocol³

Use case studies/observational findings

Present data on IAD prevalence

Analyze cost data to show cost savings

3M™ Cavilon™ Professional Skin Care Products

Cleanse/ Moisturize	Cat No.	Product	Size	Items/Box	Boxes/Case	HCPCS Code
	3380	3M™ Cavilon™ No-Rinse Skin Cleanser	8 oz. bottle	12	1	A6250
Cleanse/ Moisturize/ Protect	Cat No.	Product	Size	Items/Box	Boxes/Case	HCPCS Code
	3383	3M™ Cavilon™ 3-in-1 Incontinence Care Lotion	8 oz. bottle	12	1	A6250
Protect	Cat No.	Product	Size	Items/Box	Boxes/Case	HCPCS Code
	3345	3M™ Cavilon™ No Sting Barrier Film	3 mL wand	25	4	A6250
	3346	3M™ Cavilon™ No Sting Barrier Film	28 mL bottle	12	1	A6250
Protect/ Restore	Cat No.	Product	Size	Items/Box	Boxes/Case	HCPCS Code
	3353	3M™ Cavilon™ Durable Barrier Cream Fragrance Free	2g sachet	20	12	A6250
	3354	3M™ Cavilon™ Durable Barrier Cream Fragrance Free	1.0 oz. tube	48	1	A6250
	3355	3M™ Cavilon™ Durable Barrier Cream Fragrance Free	3.25 oz tube	12	1	A6250
Moisturize	Cat No.	Product	Size	Items/Box	Boxes/Case	HCPCS Code
	3386	3M™ Cavilon™ Extra Dry Skin Cream	4 oz. tube	12	1	A6250
	9205	3M™ Cavilon™ Moisturizing Hand Lotion	16 oz. bottle	12	1	A6250
	9215	3M™ Cavilon™ Moisturizing Hand Lotion	2 oz. personal size bottle	48	1	A6250
Treat*	Cat No.	Product	Size	Items/Box	Boxes/Case	HCPCS Code
	3389	3M™ Cavilon™ Antifungal Cream	2 oz. tube	12	1	A6250
	3390	3M™ Cavilon™ Antifungal Cream	5 oz. tube	12	1	A6250

*For treatment of superficial skin infections caused by yeast (*Candida albicans*)

Disclaimer: HCPCS codes have been provided to assist you in the preparation of insurance claims. Please note, however, that the reimbursement information provided by 3M Health Care and its representatives is intended to provide general information relevant to coverage and coding for 3M products. Insurers' reimbursement policies can vary and the use of the codes discussed here does not guarantee that an insurer will cover or pay at any particular level. Health care providers should exercise independent clinical judgment in choosing the codes which most accurately describe the products provided.
