

How 3M addresses copy-paste in the EHR

What do we analyze?

Documents within a visit

Documents across visits

What is customized?

3 levels of customization

Provider level

Document level

Document section

It's all about assessing the risk and routing it appropriately.

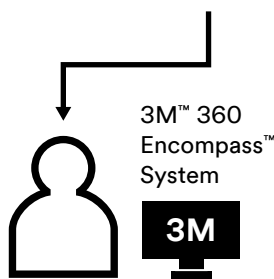

Risk Assessment Module: Scores the risk-level of the copied text and routes the alert to either a reviewer or directly to the provider for action.

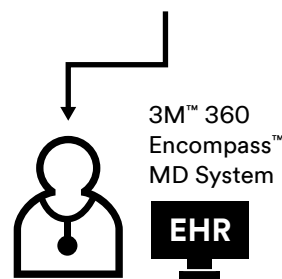

Low risk

Medium/
High risk

Very high risk

Reviewer Workflow Tool

Provider EHR Documentation
