**Predictable  
impressions  
for your  
unpredictable day**

# A successful procedure starts with the right materials.

## Everyday impressions

### 3M™ Imprint™ 4 VPS Impression Material

Make precision an everyday occurrence. Imprint 4 VPS Impression Material provides:

- Sufficient time to load and seat the tray—no stressful race against the clock
- Reduced chair time and stress for patients—Imprint 4 material has the shortest intraoral setting time among leading VPS fast-setting impression materials

## For all challenges and implants

### 3M™ Impregum™ Polyether Impression Material

Remove the pressure of challenging cases. Impregum Polyether Impression Material gives you:

- Superior moisture tolerance for void-free impressions, even in wet environments
- Sustained flowability throughout the entire working time
- Unique snap-set behavior—setting doesn't start until working time ends
- Classic materials offer all the working time you need for large cases
- Super Quick materials offer a 2-minute set time and improved taste for better patient comfort in small cases

## An easy step into digital dentistry

### 3M™ True Definition Scanner

Proven to be more accurate—and more consistently accurate—than other leading intraoral scanners, the 3M™ True Definition Scanner helps eliminate remakes and adjustments.<sup>1</sup> The innovative design allows for fast, easy and comfortable scanning. Plus, the low cost of entry enables you to take the step into digital impressioning.

# Gain control of your impression from start to finish.

## Before the procedure

### Prepare in advance

The 3M™ Intra-Oral Syringe can be prefilled up to 12 hours in advance without the material setting, so you can prepare for your daily case load.

## The impression procedure

Efficient tissue prep and precise dispensing contribute to a successful procedure.

### Manage tissue gently

3M™ Astringent Retraction Paste, with its extra-fine tip, offers a faster and gentler way to retract gingival tissue and control bleeding.

### Syringe more precisely

Apply wash materials with extreme accuracy and less waste. The 3M™ Intra-Oral Syringe enables easy handling and intraoral access.

# ression

## Skip the tray adhesive

Save time with the ready-to-use 3M™ Impression Tray. Simply fill directly from the mixing device. The unique design controls material flow, minimizing defects and voids. And the fleece strip replaces messy, time-consuming tray adhesives.

## Automix fast and easily

Cut down on steps, waste, mess and hand fatigue. With the push of a button, get a homogeneous mixture and deliver just the right amount, whether it's Imprint 4 VPS or Impregum Polyether materials.

- 3M™ Pentamix™ 3 Automatic Mixing Unit is small and fast, perfect for high-volume practices.
- Affordable 3M™ Pentamix™ Lite Automatic Mixing Unit is easy to carry and store, and ideal for practices with multiple operatories.

# Make better impressions.

3M gives you exactly what you need to simplify the process and achieve consistent clinical results.

**How you get there:**

With products that set fast yet give you enough working time. Ingenious tools that streamline the procedure. And troubleshooting tips to help you ace every impression, so restorations fit.
