Opening doors to timeless looks and performance.

Doors create access, protect boundaries, and set the tone for what's inside. Unfortunately, rivets and screws can break down over time, compromising aesthetics and security. 3M™ VHB™ Tape helps create doors with timeless looks and performance.

Disperses stress.

Mechanical fasteners create stress points that can be vulnerable to bends and breaks. 3M™ VHB™ Tape creates continuous bonds that help distribute stress across the entire bonding area.

Dampens sound and vibration.

Rivets and screws can be noisy. Waves of sound and motion bounce through the gaps amplifying sound and stress. 3M™ VHB™ Tape features viscoelastic properties that help absorb energy – and the impact on the bond.

Protects from extreme elements.

Heat, cold, humidity, rain, and – of course – snow storms. 3M™ VHB™ Tape offers mechanical and chemical properties that can help endure whatever the harsh Canadian climate throws at you.
