

## 3M™ Disposable Respirator Stockpile Maintenance Program

# What to know before you throw.

### Why let your expired respirators go to waste? Check out these sustainable disposal options for 3M™ N95 Respirators

The 3M Disposable Respirator Stockpile Maintenance Program offers you several sustainable, convenient and cost-effective options for disposing of your aging and expired stockpiles of 3M™ N95 Respirators.

#### ✓ Option 1: Recycling

Expired/aging product can be recycled into new plastic products. For instance, through Deltco Plastics, there is no charge for this service (customers do pay shipping charges). Contact Deltco or your recycling provider to confirm eligible products, quantities and fees (if any).

#### ✓ Option 2: Waste-to-Energy (W2E)

In this option, disposed products are used as fuel for power generation. Contact independent providers, such as Covanta Environmental Solutions or LJP Enterprises, to verify that your products are eligible. Contact a facility close to you. For your convenience, a list of facilities from CES and LJP is listed on the back page. Shipping and disposal costs are typically the responsibility of the stockpile owner.

#### ✓ Option 3: Donation

Aging product with at least 12 months of shelf life remaining can be put in the hands of groups in need. We'll help you identify donation options for your N95 stockpile. This solution may also allow your organization to receive a tax credit. Contact **Michael Stroik** at **651-736-7068** or **mstroik@mmm.com** to see how 3M's philanthropic arm, 3Mgives, may be able to help.

**Note:** The options on this page are not exclusive, and other options or partners may be available. The above content merely presents sustainable options that your organization may wish to consider, and (with the exception of 3Mgives), **3M takes no ownership or responsibility, and makes no representations or warranties**, for outcomes or actions associated with the listed organizations.
