**3M™ Scotch-Brite™ Floor Pads.
Simply more effective.**

It's all in the name.

3M™ Scotch-Brite™ Floor Pads
work harder, faster, for longer – at
a total lower cost

- Remove deep scuff marks 7 times faster*
- Nearly 40% more aggressive floor stripping*
- 25% better cut on Schiefer test*
- 50% better burnishing durability*
- Reduces need for chemical strippers and finishers
- Washable and reusable

*When compared to closest competitor

3M revolutionized floor maintenance more than 50 years ago with the world's first synthetic non-woven floor pads.

Today our latest generation of floor pads continue to offer performance, productivity and durability benefits to our customers.

Each Scotch-Brite floor pad is precision engineered for a particular floor surface and maintenance task, and manufactured to the highest quality standards.

So whether you need to strip an existing floor coating, spot-remove unsightly marks, or polish your floors to a high gloss finish, you can rely on Scotch-Brite floor pads to work faster, harder and for longer with minimal operational downtime and at a lower cost. It's no wonder we are one of the world's leading floor pad suppliers.

3M. Floor Pad experts who keep on innovating.

At 3M we are continually pushing the boundaries of floor pad technology to help you reduce your cleaning and maintenance costs without affecting the quality of your service.

3M innovation means

- Better performance
 - Longer lasting pads
 - Improved productivity
 - Reduced labour costs
 - Ease of use
 - Safer for your staff
 - Potential new revenue streams
-

Our latest generation of floor pads not only make it quicker and easier than ever to strip, clean and polish your floors - they are safer and more cost-effective too.

3M™ Scotch-Brite™ Surface Preparation Pads

Scotch-Brite surface preparation pads quick-strip and deep-clean floors without the need for chemicals, using just neutral detergent and water. Customer trials reveal that, used with a standard rotary floor machine, they can save up to 74% in labour costs compared to conventional chemical stripping.

3M™ Trizact™ Diamond HX Discs

Trizact diamond HX discs use the latest diamond abrasive technology to transform dull and scratched stone floors into beautiful shiny ones at a fraction of the cost of employing a specialist grinder. Simply use with your existing floor cleaning equipment.

NEW

3M™ Scotch-Brite™ High Shine Floor Pads

Scotch-Brite high shine floor pads were developed in response to demand from customers for a premium pad that boosts productivity and lowers costs, without compromising on shine.

Not only do the Scotch-Brite high shine floor pads clean and polish stone, plastic and linoleum floors to a brilliant gloss finish – they go on working for up to three times longer than existing single-sided high performance floor pads, resulting in significant total cost savings.

Longer lasting through and through

Scotch-Brite high shine floor pads are precision engineered for consistent, longer lasting performance. Each pad incorporates

Not only are both sides of the Scotch-Brite high shine floor pads coated with mineral abrasives, but they are also unique in containing the abrasive within the pad itself.

mineral abrasives on both sides for double-sided use. And uniquely each pad contains mineral abrasives within the pad itself for even greater durability.

The system approach to dull or worn floors

If your floor appears dull or worn, we recommend you use 3M™ Scotch-Brite™ Sienna High Shine Floor Pad to help condition the floor and bring it to a medium gloss. Then to further enhance the floor appearance and bring it to a high shine use the 3M™ Scotch-Brite™ Purple High Shine Floor Pad. The gloss finish on the floor can be maintained through regular cleaning and conditioning using Scotch-Brite Purple High Shine Floor Pad in conjunction with an auto-scrubbing machine or a low speed rotary floor machine, and just with the simple addition of water.

Kinder on the environment

The High Shine Floor Pads allow the maintenance and polishing of flooring without the use of strippers and floor finishes, helping to eliminate the use of chemicals. Double-sided, washable, reusable and they last longer than existing high performance floor pads.

Scotch-Brite sienna high shine floor pad

For worn and dull floors in poor initial condition. Cleans, conditions and polishes to a medium shine.

Scotch-Brite purple high shine floor pad

For floors with medium shine in good initial condition. Cleans and polishes floors to a brilliant gloss finish.

**The differences
may not always be
obvious to the eye,
but with 3M you can
rest-assured that
performance and
durability are built-in
to every floor pad.**

Tried. Tested. Trusted.

3M has an outstanding track record in the three core elements that make up a floor pad.

It's the unique combination of our non-woven fibres, uniform distribution of our abrasives, and strength of our adhesive binders that set 3M™ Scotch-Brite™ Floor Pads apart from the competition.

The differences may not always be obvious to the eye, but with 3M you can rest-assured that performance and durability are built-in to every floor pad.

- Designed for specific maintenance tasks
- Engineered to the highest quality standards
- Uniformity and quality helps produce:
 - Less machine wobble and vibration
 - Less operator fatigue
- Prolonged useful life of the pad
- Better results on your floors.

All floor pads are NOT created equally

3M™ Floor Pads

Uniform distribution of mineral abrasives throughout the pad significantly enhances performance and prolongs pad life. Fibres are uniformly coated with resin and mineral, producing more consistent, high-quality results. Combination of highly conformable fibres provide maximum pad-to-floor contact.

Other floor pads

Surface abrasives wear through rapidly. Fibres are randomly coated with resin and mineral, which can produce inconsistent results. Larger fibres are less conformable, providing fewer contact points with the floor.

3M. Sustainable solutions for a cleaner future.

3M is committed to developing sustainable solutions that outperform their conventional alternatives – and to manufacturing them in a way that minimises our environmental footprint.

Fewer chemicals

Unlike traditional floor pads which rely on the mixing and application of hazardous chemicals, the latest range of premium floor pads from 3M are designed for use with neutral detergent or water, making them a safer choice.

Recycled and reusable

The polyester fibres used to make 3M™ Scotch-Brite™ Premium Floor Pads Range contain a minimum of 50% post consumer recycled content. 3M™ Floor Pads packaging consists of 75-100% recycled material and the packaging is 100% recyclable. And all 3M™ Scotch-Brite™ Floors Pads are washable and reusable, further helping to reduce the amount of waste.

Life Cycle Management

Every Scotch-Brite floor pad undergoes a 'Life Cycle Management' assessment to determine and help minimise its potential health, safety, environmental and regulatory impact throughout its lifetime.

Operational excellence

3M Floor Pads manufacturing facilities operate under a philosophy of operational excellence and continuous improvement, aligned with corporate sustainability goals:

- In 2014 our US plant achieved the US Environmental Agency's ENERGY STAR award for the 10th year in a row
- Certified to ISO 14001, our US and French manufacturing plants are committed to a robust environmental management system

Monday to Friday

Admissions Planning

The polyester fibres used to make 3M™ Scotch-Brite™ Premium Floor Pads contain a minimum of 50% post consumer recycled content.

3M. Leading the way in surface care.

Not content with revolutionising the floor pad, 3M applies the same innovative thinking to develop a new generation of surface care solutions.

From protective floor coatings to high-performance glass cleaners, dusters and wipes, these products are not only designed to improve productivity, lower costs and enhance sustainability – they can also reduce the need for cleaning and maintenance altogether.

3M™ Scotchgard™ Floor Protectors

Scotchgard floor protectors can save you up to 60% on your annual floor care labour and chemical costs. Just two coats produce a clean, safe glossy floor that is less susceptible to scuffs, scratches, black marks and yellowing. Finished floors last up to a year with minimal maintenance.

3M™ Easy Trap Duster

3M Easy Trap Duster traps and holds six times more dust, dirt, sand and hair than traditional mops and other disposable dusting systems. The disposable sheets can be easily attached to most cleaning tools, and are two-sided for longer lasting use.

3M™ Scotchgard™ Glass Cleaner & Protector

Scotchgard glass cleaner & protector has been shown to significantly outperform other leading glass cleaners, cutting cleaning times by up to 50%. Repeated usage creates an invisible layer of 3M™ Scotchgard™ Protection that makes it harder for fingerprints, lipstick and even permanent marker to adhere.
