3M™ PPS™ Colour Match Film

Achieving the perfect colour match

3M™ PPS™ Colour Match Film

3M™ PPS™ Colour Match Film utilises a proprietary film technology to bring an unparalleled level of flexibility, conformity, and accuracy to one of the most difficult challenges in shops today; achieving the perfect Colour match. 3M™ PPS™ Colour Match Film allows users to adhere the painted film directly to the substrate (e.g. bumper, wing, vehicle) and STAND BACK for viewing at any angle. With enhanced side-tone capabilities, and ability to conform to the substrate, it gives painters the confidence that they have met a perfect match. When an acceptable match has been achieved, simply reapply the film to the textured backside for easy cataloguing and reuse.

- STAND BACK from vehicle/substrate for viewing at any angle
- Enhanced Side-Tone representation
- Conforms to vehicle/substrate contours
- Available in 3 colours reducing the need for primer
- Easily reapply coloured film to textured backside for cataloguing and future use

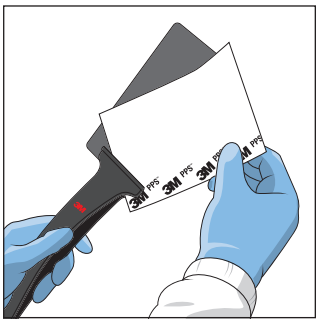

3M™ PPS™ Colour Match Film 3 Colour Shades: White, Medium Grey and Dark Grey

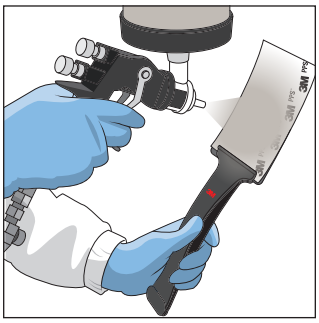

3M™ PPS™ Colour Match Film

How the system works:

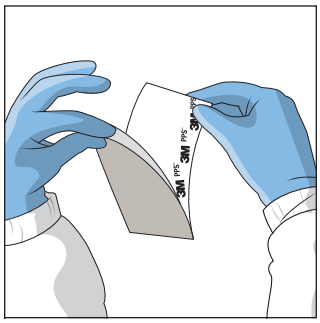

Treat the 3M™ PPS™ Colour Match Film exactly as you would a traditional spray out card, either solvent or waterborne. 3M™ PPS™ Colour Match Film allows you to check your colour match the same as your process today; utilising either wax & grease remover or clearcoat simulator. Choose the preferred film colour and reduce your need for sealer application. Simply peel the painted film from the backer and apply to the surface of the substrate (e.g. vehicle, wing, bumper) and stand back for viewing at any angle! When colour match has been achieved, reapply film to textured film backer for quick and easy cataloguing.

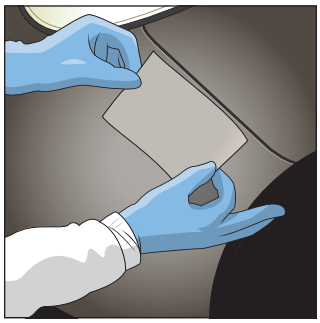

Select film colour and place onto 3M™ PPS™ Colour Match Film Holder

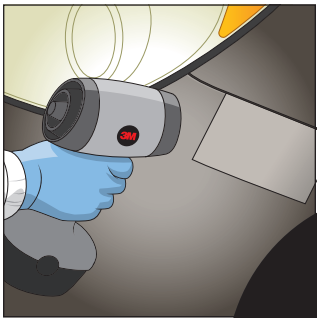

Spray 3M™ PPS™ Colour Match Film as you would spray any conventional colour match card

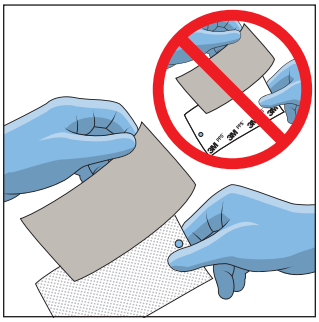

Peel away film from backing

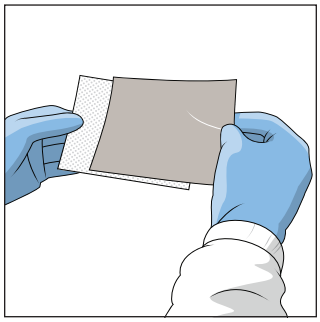

Apply film directly to properly cleaned & dried substrate (e.g. bumper, wing, vehicle)

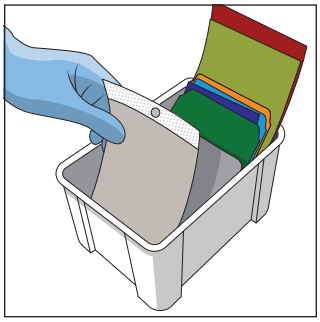

STAND BACK and view from any angle. Use with the 3M™ PPS™ Colour Check Light II to check for proper colour match and side tone representation

Use 3M™ PPS™ Colour Match Film backer for reapplication to textured backside

Reapply 3M™ PPS™ Colour Match Film to textured backside of 3M™ PPS™ Colour Match Film backer

Place 3M™ PPS™ Colour Match Film in 3M™ PPS™ Colour Match Film Catalogue Box

Part No.	Description	Colour	Items/Box	Boxes/Case
16417	3M™ PPS™ Colour Match Film	White	25	1
