**Aesthetic Restoration Solution**

**A beautiful smile  
she can't wait to share.**

# Because you want every patient to leave with a beautiful smile.

Patients love the way highly polished restorations look and feel. But creating a high-end, natural-looking gloss can take more of your valuable time. So what do you do ... sacrifice higher aesthetics for higher productivity? Or spend the extra time to create a beautiful smile. The days of time-consuming aesthetic restorations are gone. With our Aesthetic Restoration Solution, you'll love how simple it is to create natural-looking restorations with a gorgeous paste-like gloss.

Oh, don't be surprised if word of your great work gets around ... because a beautiful smile is worth sharing.

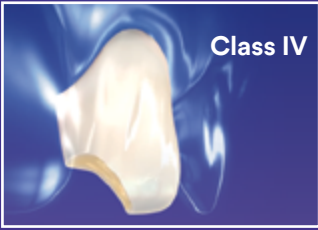

The truth is, the composite you use matters. You can spend a lot of time polishing most composites, only to find the initial gloss doesn't last long.

Or, you can create smiles your patients will love by using our Aesthetic Restoration Solution. Thanks to 3M's nanotechnology, Filtek™ Supreme XTE Universal Restorative is easy to polish and also offers excellent polish retention.

Plus, nanotechnology makes Filtek Supreme XTE restorative beautifully strong, giving you the option of using it in any place and for any Class.

Having one restorative that can do it all is a beautiful thing.

## Nanotechnology. For beautifully strong restorations ... anywhere.

# Diamond particles. For a gorgeous, paste-like gloss.

The aesthetic appearance of a restoration depends on the shade, shape and the gloss achieved by final polishing.

With the 3M™ Sof-Lex™ Diamond Polishing System, you can get a gorgeous, diamond paste-like gloss—with the convenience of a rubberised system!

The Sof-Lex™ Pre-Polishing Spiral (beige) smooths and removes scratches in restorations that develop during contouring and prepares the surface for high-gloss polishing. The Sof-Lex™ Diamond Polishing Spiral (pink) delivers the final high-gloss polish.

You'll find it reassuring to know that you no longer need to stop and switch between traditional points, cups, discs and brushes. The flexible spirals adapt to all tooth surfaces—anterior and posterior, convex and concave. They can be sterilised and reused (refer to IFU), making them an economical choice for your practice.

Filtek™ Supreme XTE Universal Restorative polished with Sof-Lex™ Diamond Polishing System providing a clear reflection due to the high gloss finished obtained.

# Now simple aesthetics can be as easy as 1, 2, 3 ...

A factor in the success of this solution is 3M's unprecedented history in abrasive technologies. We leveraged that expertise to create a polishing solution that can help you maximise the aesthetic benefits of Filtek™ Supreme XTE Universal Restorative with ease and simplicity.
