

**5 reasons to rely  
on the new 3M™  
Particulate Respirators  
8825+ and 8835+**

**More →**

The new and improved 3M™  
Particulate Respirators 8825+ and  
8835+ are packed with even more  
premium comfort features and are  
optimised for use over more than  
one shift, helping to save you money  
without having to sacrifice wearer  
comfort and acceptance.

①

**Breathe  
easy**

How? →

**3M**

### **Breathe easy**

The original, clever design provides a large surface area, which helps to reduce breathing resistance. This has been further improved by a new filter construction (8835+ only) which makes the respirator even easier to breathe through.

②

**Cool and  
comfortable**

How? →

**3M**

### **Cool and comfortable**

The trusty 3M™ Cool Flow™ Valve effectively removes exhaled air, reducing heat and moisture build-up, whilst the collapse resistant design allows the respirator to keep its shape even in hot and humid conditions.

# Better fit

How? →

**3M**

### **Better fit**

The new soft, pliable face seal forms comfortably onto a wide variety of face shapes and sizes, helping to give an improved fit. We've kept the adjustable, durable headbands to help you tailor the fit to your face & revamped them with a new colour coding system, for easy identification of protection level (blue: FFP2, red: FFP3).

**3M**

### **See clearly**

New clever face seal design is engineered to help minimise fogging of eyewear. Meanwhile the industry-proven 3M™ Cool Flow™ Valve directs humid exhaled air away from spectacles and goggles.

5

Long lasting

How? →

**3M**

### **Long lasting**

The new durable face seal can be wiped clean after use. Coupled with the robust, adjustable straps and an additional 'R' approval, this means that the 3M™ 8825+ and 8835+ can be used for more than one shift – saving you money.
