Cut challenging films with precision.

3M™ Precision Line Knifeless Tape

When installing wraps using challenging films, jagged, uneven cuts just don't cut it. 3M™ Precision Line Knifeless Tape features an ultra-sharp filament that never gets dull, even on the most demanding vinyl and non-vinyl films. It follows curves and contours and easily turns in any direction, so you can create works of art — no matter the type of film.

▲ Get precise, clean edges — even when cutting multiple layers.

3M™ Precision Line Knifeless Tape

▲ Create outstanding designs directly on the car.

Cutting-edge designs start with a clean cut.

This revolutionary tool gives even the most challenging film installations — from reflective films to films with specialty overlaminates — a sharp, clean edge.

- ▶ Ultra-sharp filament cuts carbon fiber, reflective, metallic, chrome and sparkle films
- ▶ Cut through the most challenging films without having to replace a dull blade mid-cut
- ▶ Create designs on the car, not the computer
- ▶ Patented design turns easily in any direction to follow contours and curves
- ▶ Able to cut multiple layers of thicker films and films with specialty overlaminates
- ▶ Easily cuts dry-erase and 3M™ DI-NOC™ films, plus all other vinyl and non-vinyl films
