

User Instruction Manual Harness Hydration System

Step 1.

Loosen the webbing at the back of the harness where it crosses, just beneath the D-ring.

Step 2.

Unsnap the buckle on the back of the Hydration Pack and thread the buckle behind the harness webbing.

Step 3.

Pull the buckle and strap completely through the harness webbing.

Step 4.

Clip the two portions of the buckle back together.

Step 5.

Turn the harness and pack over. Unsnap the snaps on the straps at the bottom of the pack. Wrap the straps around the harness webbing.

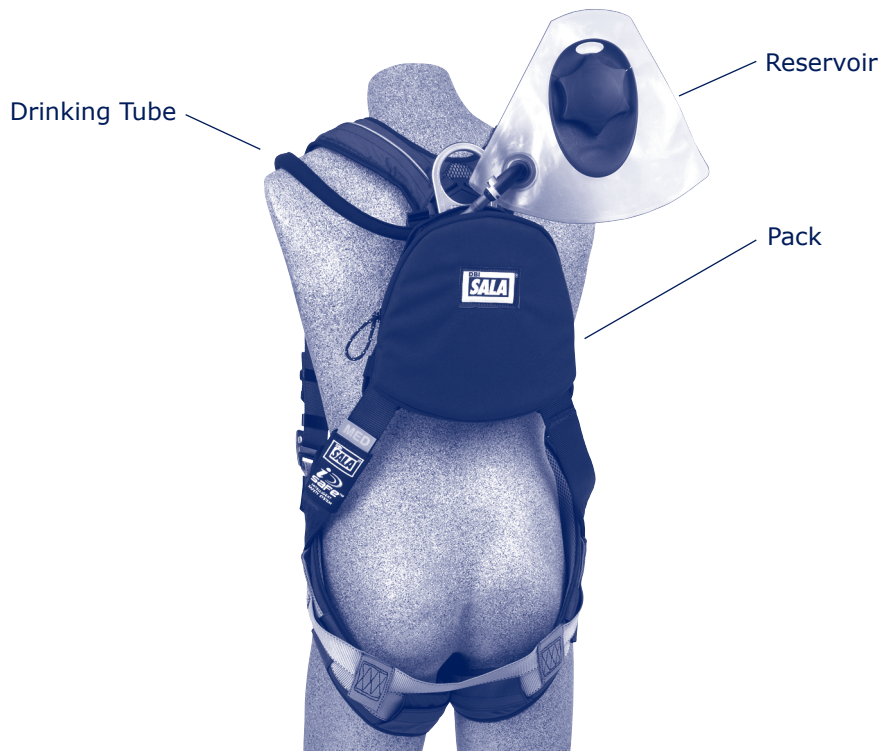

Step 6.

Fasten the snaps securely back into place on the back of the pack.

The Hydration System is now securely attached to the harness and ready to be used. Adjust the length of the strap and buckle at the top of the carrier to raise or lower the carrier for the best fit. On some harness models it may be necessary to loosen the top strap all the way so the straps and snaps at the bottom of the carrier are able to go around the harness webbing.

The drinking tube can be positioned on either side of the harness and includes a clip to hold the bite valve in place on the harness.

CLEANING AND MAINTENANCE

Hydration Reservoirs:

To clean your hydration reservoir use hot water and mild soap, then rinse thoroughly with hot water.

For tough cleaning jobs, add 2 teaspoons of baking soda to a full reservoir of water and let soak overnight. Rinse thoroughly and air dry.

To sanitize, add 2 teaspoons of unscented household bleach to a reservoir full of clean water and let soak overnight. Rinse thoroughly and air dry.

Store your hydration system in a cool dark place.

Prior to each use, fill the reservoir, tighten the cap, then squeeze the reservoir and watch for leaks to ensure that the cap is sealed properly.

When freezing, fill reservoir no more than 3/4 full.

Packs:

NOTE: Wash packs in a FRONT LOAD WASHING MACHINE ONLY.

Washing Instructions:

Clean off excessive dirt and debris by hand.

Connect all buckles and tighten straps.

Wash in a front load machine only with warm water and a mild detergent.

Tumble dry low or air dry.

If possible, store your pack in a cool, dry place.
