3M™ C. diff Solution Tablets

Sporicidal Disinfectant in effervescent tablet form.

*Refer to product label for complete list of microorganisms this product is effective against and complete directions for use.

A disinfectant without a dispenser.

When it comes to the cleanliness and disinfection of your surfaces, you can't take chances. 3M™ C. diff Solution Tablets offer customers a way to dilute and use an EPA registered disinfectant without the need for a chemical dispenser.

- ▶ For use on hard, non-porous surfaces in healthcare (acute/long term), education, commercial buildings, and other facilities especially where dispensers aren't an option.
- ▶ EPA-registered to kill C. diff spores in 4 minutes.*
- ▶ EPA-registered and effective against SARS-CoV-2 (the cause of COVID-19) in 4 minutes at 1076ppm on hard, nonporous surfaces.
- ▶ Effective against Norovirus, *Salmonella enterica*, *Staphylococcus aureus*, *Pseudomonas aeruginosa*, carbapenem-resistant *Klebsiella pneumoniae* and *Acinetobacter baumannii*.*
- ▶ The 3M™ C. Diff Solution tablets' NaDCC (Sodium Dichloroisocyanurate) chemistry and bleach (Sodium Hypochlorite) are different chemistries. When diluted properly with water, NaDCC doesn't generate the chemical byproduct Sodium Hydroxide, which is a caustic compound that is a byproduct of bleach. This is one of the delineations between the two chemistries.
- ▶ Features an NFPA/HMIS rating of 0,0,0 in the diluted use solution.
- ▶ pH of 5.5 to 6.5 is closer to neutral opposed to typical bleach options.
- ▶ Tablet form is convenient and cost effective.
- ▶ 5-year tablet shelf life in sealed packets; 3-year tablet shelf life in loose containers.
- ▶ Dissolvable tablet comes in two sizes for use in large and small containers.
- ▶ Dissolves fast and completely.
- ▶ Highly versatile — use with a cloth, wipe, mop or coarse trigger sprayer. NaDCC chemistry will not bind to common wiping media.
- ▶ Easy to use, with a mild chlorine smell.
