

PRODUCT CHANGE NOTICE

Removal of 3M™ Adapter V-199 from certain 3M™ Respiratory Products

November 10, 2016

Dear Valued Customer:

As part of ongoing efforts to ensure that 3M™ manages its product line in an efficient manner, we are removing the [3M™ Adapter V-199](#) from kits and assemblies where the adapter is not needed for functionality of the intended respiratory system (see table 1 for impacted SKUs). The 3M™ Adapter V-199 is used for connecting 3M™ Versaflo™ BT-Series breathing tubes to 3M™ GVP-Series Belt-Mounted PAPR systems 3M™ V-Series Air Regulating Valve Assemblies.

In addition, the 3M™ Adapter V-199 will no longer be included as part of the 3M™ Versaflo™ BT Series Breathing Tube packaging (see table 2 for impacted breathing tube SKUs).

The 3M™ Adapter V-199 will now need to be ordered as a standalone product with 3M™ GVP-Series Belt-Mounted PAPR systems using 3M™ Versaflo™ BT Series Breathing Tubes. The only exception to this will be the 3M™ Belt-Mounted PAPR Painters Kit GVP-PSK2 which will continue to come with the 3M™ Adapter V-199 included in the package. The 3M Adapter V-199 will

continue to be available as a replacement part, sold in a four pack, and the product numbers (3M ID 70071042512 and UPC 00051131370692) will remain the same.

As part of this change the 3M™ Adapter V-199 will now be included as part of all 3M™ V-Series Air Regulating Valve Assemblies (see Table 3 for SKU list).
