3M™ Cool Roofing Granules are used in shingles that can be energy efficient, solar reflective and economically friendly. Their solar reflective nature allows the granules to reflect sunlight and heat that other shingles would typically absorb.

Improving Our Climate  
3M™ Smog-reducing Granules

CO7106  
Gray

3M™ Smog-reducing Granules allow shingle manufacturers to produce shingles that help eliminate smog pollutants and improve air quality. By choosing shingles with smog-reducing granules, roofs can be transformed into a smog-fighting surface.

**Note:** Colors shown may not be exact due to photography and printing process. Please contact your 3M sales representative for actual roofing granule samples.
