You choose it for speed. Now it’s more esthetic, too.
You’ll like that it’s simple. They’ll be happy that it looks good, too.

3M™ Filtek™ One Bulk Fill Restorative

It’s true. Now bulk fill placement can be more esthetic.

Posterior restorations are challenging—which is why bulk fill composites that simplify and speed up the procedure have become so popular.

However, until now, the faster, easier placement of bulk fill has been at the sacrifice of esthetics. So, as a global leader in esthetic and restorative technologies, we went back to our experts for a solution you’re sure to love:

3M™ Filtek™ One Bulk Fill Restorative.

Designed for the posterior, its unique optical properties and improved opacity give you the simplicity of one-step placement—up to 5 mm—without compromising esthetic results.

Now you and your patients have something to smile about.
How 3M Science enables the simplicity of one-step bulk placement with improved esthetics.

The technologies behind 3M™ Filtek™ One Bulk Fill Restorative

NEW! Smart Contrast Ratio Management

Increases opacity without sacrificing depth of cure

Further development of 3M nanotechnology allows us to manage opacity and depth of cure in a smarter way. With our unique Smart Contrast Ratio Management technology, we’ve increased opacity without reducing depth of cure.

In its cured state, 3M™ Filtek™ One Bulk Fill Restorative has a higher opacity than 3M™ Filtek™ Bulk Fill Posterior Restorative, resulting in improved esthetics.

Contrast Ratio

![Contrast Ratio Chart]

3M™ Filtek™ Bulk Fill Posterior Restorative: 43*
3M™ Filtek™ One Bulk Fill Restorative: 51*

Did you know?

Contrast Ratio is the measurement of the translucency or opacity of the material.

Innovative AUDMA and AFM monomers

Reduces shrinkage and relieves stress to allow bulk fill placement up to 5 mm.

- Addition-fragmentation monomer (AFM) relieves stress during polymerization.
- Aromatic urethane dimethacrylate (AUDMA) helps reduce the amount of shrinkage and stress that occurs during polymerization.

3M’s TRUE nanofiller technology

Provides superior wear resistance and excellent polish retention.

*The contrast ratio is the average of all shades.
Now that you’ve repaired the tooth, help them protect the restoration at home.

3M™ Clinpro™ 5000 1.1% Sodium Fluoride Anti-Cavity Toothpaste

Patients who are at a moderate to high risk for cavities are in need of preventive treatment—however, patient compliance can be a concern. When you prescribe 3M™ Clinpro™ 5000 1.1% Sodium Fluoride Anti-Cavity Toothpaste with TCP from 3M, you are providing a prescription-strength formulation that’s easy for anyone to use. It delivers more fluoride than over-the-counter toothpastes to help strengthen and repair enamel—and is backed by over five years of clinical usage. Plus, it’s as easy to apply as brushing your teeth.

- Protects against cavities and helps reverse white spots
- Proven through 5 years of clinical usage
- Low abrasion
- One-step convenience improves patient compliance—patients simply switch to Clinpro 5000 toothpaste for their brushing regimen

Prescription only. Use in adults and children 6 years of age and older. Use once daily in place of conventional toothpaste. Go to www.3M.com/dental to obtain the full prescribing information or call 1-800-634-2249. You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.
