

Dear Doctor,

We're constantly surveying the landscape in the oral care industry to find the best possible materials to offer you – our valued customers. We understand the demands of patients – they want natural looking restorations that are going to hold up for the long haul. So, basically, they want the closest thing to natural teeth that they can get! Well, we're confident that we have found the material that is everything you ever wanted in one crown.

Introducing 3M™ Lava™ Esthetic Fluorescent Full-Contour Zirconia – Discover the next level of cubic zirconia esthetics!

- Excellent shade match to VITA® Classic shades by built-in shade gradient
- Durable full-contour. 800 Mpa through and through!
- High translucency. Optimized for esthetic full-contour restorations
- First zirconia with inherent, toothlike fluorescence
- Easy cementation with 3M™ RelyX™ Unicem 2 Self-Adhesive Resin Cement

Contact us to make your next crown, 3-unit bridge, inlay/onlay, or veneer case a Lava Esthetic zirconia case!
