

Are you protecting your repairs against corrosion?

With ever-evolving substrates in automotive construction, industry organizations and OEMs alike recommend cavity wax to help prevent corrosion.

3M™ Cavity Wax Plus 08852 is a simple and effective way to help ensure corrosion protection, one of the most important parts of automotive repairs.

1,500 hours: salt spray results

Actual panel test results ASTM B117 1,500 hours.

Without protection

With 3M™ Cavity Wax Plus 08852 (3 coats)

Are you taking the steps to prevent corrosion today?

According to I-CAR® Corrosion Protection CPS01, cavity wax is recommended post repair*. In addition, numerous OEMs call for a corrosion protection product during vehicle repair**.

3M™ Cavity Wax Plus 08852

Non-hardening corrosion protection in a convenient aerosol can for internal cavities.

- Self-healing corrosion protection for inner body panels, frame rails and structural enclosures.
- When used according to directions, 3M™ Cavity Wax Plus delivers the right amount of flow and wicking, providing consistent and uniform protection for your repair.
- Eliminates the need for antiquated and messy bulk spray technology to apply corrosion protection to a vehicle.
- Provides access to inner body structures with tight tolerances.

3M™ Cavity Wax Plus

Part No.	Size	Product	Case Qty.
08852	511 g (18 oz.) aerosol	3M™ Cavity Wax Plus	4

3M™ Cavity Wax Plus Applicator Wand Kit 08851

Protect hard-to-reach places.

- 3M™ Cavity Wax Plus Applicator Wand Kits provide three useful options (20.3 cm, 61 cm and 86.4 cm) to access hard-to-reach places when applying corrosion protection coatings (inner rocker panels, dog legs, unside constructions, frame rails, etc.).
- 20.3 cm tube delivers a powerful stream of material to flood joints and seal them from corrosive elements.
- 61 cm and 86.4 cm wands provide a uniform 360-degree spray pattern to ensure maximal coverage with each application.
