Protecting facilities, foods and families.

3M™ Pathogen Detection Solutions
Working together toward a safer world.

To truly protect your company and consumers, you need precise, reliable, consistent information. After all, the smallest error could have global ramifications on public health — as well as your reputation, brand, sales and business.

Trust 3M for a comprehensive line of pathogen testing products that work together to elevate your lab’s performance. Our cutting-edge technology provides a versatile, end-to-end portfolio of solutions for a variety of lab environments. Plus, our team of knowledgeable experts is there to listen, collaborate and help you work toward even greater efficiency and accuracy. With more than 30 years of global experience in the food safety industry, we supply breakthrough science and back it up with local support — making you the hero every time.
Amplify your confidence.

3M™ Molecular Detection System

Make sure your process is running quickly and efficiently. Streamline your workflow and reduce technician time. Get advanced technology that’s constantly evolving to meet your needs with the next generation of 3M™ Molecular Detection Assays.

- Detect *Salmonella*, *E. coli* O157 (including H7), *Listeria*, *Listeria monocytogenes*, *Cronobacter*, *Campylobacter*, STEC Gene Screen (stx) and STEC Gene Screen (stx and eae)
- Single assay protocol improves productivity
- Same- or next-day results mean you don’t have to wait
- Ready-to-use reagents save time and labor costs
- Space-saving instrument tests for multiple pathogens simultaneously
Get results faster.

3M™ Petrifilm™ Salmonella Express System

This all-in-one, sample-ready pathogen test has everything you need to detect and biochemically confirm Salmonella.

- The first 3M™ Petrifilm™ System for pathogen testing
- Provides results in half the time of traditional methods with great efficiency and less waste
- Easy colony interpretation
- Presumptive positive results in as little as 40 hours
- Biochemically confirms colonies in four hours
- Longer shelf life and more compact than traditional agar
Committed to protecting your brand.

In this business, trust is everything. That's why we continue to pursue method validations for our pathogen detection solutions from internationally recognized third-party agencies, such as AOAC® INTERNATIONAL and NF VALIDATION by AFNOR Certification, in addition to recognitions from government and regulatory organizations worldwide.
Global experience. Local support.

Protecting the world’s food supply is a big responsibility — but you don’t have to do it alone. Our people support you locally by providing technical expertise and exceptional service. It’s our job to help you protect your brand, mitigate risk and improve operations.
