

Confined Space Rescuer Training

Course description:

This course is designed to provide confined space rescue training to entry supervisors and/or entrants. The course involves both classroom presentations as well as a high degree of hands-on scenarios that will require attendees to actively participate in confined space rescue applications. It utilizes pre-engineered rescue systems and techniques that are easily adaptable to both team and peer rescue. Specific focus on the implementation and monitoring of a rescue plan will be covered. It should be noted that this is not a technical rope rescue course.

Upon successful completion of this course, the student will receive a certificate acknowledging they have met or exceeded OSHA and ANSI requirements.

Duration:

3 days (up to 24 hours)

Recommended attendance:

This course is for personnel who supervise or must access, work and/or perform rescue within confined spaces. This course includes the 2 day (up to 16 hour) Confined Space Entrant/Supervisor course.
