

Wind Energy Competent Rescuer Trainer Training

Course description:

With the growing demand for height safety training within the wind energy markets, 3M Fall Protection has developed a training program that prepares employers to conduct on-site rescue training to their employees.

This course is specifically designed for individuals who work at height on wind turbines and is a pass/fail program that incorporates extensive classroom and hands-on training. The first two days of this program is the Wind Energy Competent Rescuer course. The final 2 days are focused on adult learning, lesson plan development and teaching methods so that the attendee can effectively conduct Wind Energy Authorized Rescuer training.

Upon successful completion of this course, the student will receive a certificate acknowledging they have met or exceeded OSHA and ANSI requirements as a Competent Rescuer and Authorized Rescuer Trainer.

Duration:

4 days (up to 32 hours)

Recommended attendance:

This course provides training for individuals that work on wind turbines and want to be a Competent Rescuer and subsequently deliver Authorized Rescuer training to their employees. The prerequisite for this course is successful completion of the Wind Energy Competent Rescuer course.
