Syringe refills contain 1 syringe of 3g
Capsule refills contain 20 capsules of 0.2g

Advantages at a glance

- Save money, without compromising on quality
- Easy to sculpt and adapts well to margins and cavities\(^1\)
- Non-sticky formulation for efficient working
- Polish retention similar to a microfill\(^2\)
- Eight natural shades and one opaque shade, compatible with VITAPAN classical shade guide
- Available in capsules or syringes

At 3M ESPE we believe every patient deserves the best. Filtek Z500™ Universal Restorative was developed to fulfill the demand for an everyday restorative solution, at an affordable price. In fact by switching to Filtek Z500 you can save on average £770 a year* without compromising on quality.

Based on over 40 years of experience, Filtek Z500 universal restorative is the latest addition to our Z-family of restoratives. Thanks to ongoing enhancements, the Z-family has been continuously improved and is a firm favourite of many dentists across the UK and Ireland. In fact, 3M ESPE is proud to be the UK’s market leader in composite restoratives1.

Simple Handling
Filtek Z500 universal restorative is easy to sculpt and adapts well to margins and cavities2. This enables you to create restorations easily and precisely. Also noted for its non-sticky consistency, Filtek Z500 allows you to work efficiently and comfortably3.

Beautiful Results
Compatible with the VITAPAN® Classical Shade Guide, Filtek Z500 universal restorative enables you to select the right shade for natural looking restorations. Of course, natural looking teeth must retain their gloss. Thanks to 3M ESPE’s patented nanotechnology the polish retention of Filtek Z500 is similar to a microfill4, so your patients’ restorations will look great for longer.

Long-Lasting
In addition to aesthetically pleasing restorations, patients also value durability. In comparative tests with other popular composites, Filtek Z500 universal restorative achieved excellent scores in terms of flexural strength5, fracture toughness6 and wear7.

Did you know?
Unlike other restoratives, 3M ESPE builds its nanocomposite using a patented process that produces nanoclusters – tightly packed clusters of nanocomposite material. This allows the nanoclusters to shear at a rate similar to the surrounding resin matrix during abrasion. This allows the restoration to maintain a smoother surface for long term polish retention8.

Filtek Z500™ Universal Restorative delivers natural looking restorations for a wide number of indications:
- Direct anterior and posterior restorations
- Sandwich technique with glass ionomers
- Core build-up
- Indirect anterior and posterior restorations, including inlays, onlays and veneers

What our clients say...
“Filtek Z500 is an excellent material, it is highly aesthetic whilst being cost effective compared to its competitors. It is very easy to manoeuvre and place and I’m extremely pleased with the results. I have no hesitation in recommending this to my fellow colleagues.”
Dr Arif Ullah, Chairman of BDA Forest Section & Principal Leyton Dental Practice, London

“Z500 is a truly universal composite, with great handling characteristics. The material has allowed me to provide restorations with the aesthetics I would have expected from more expensive and complicated systems. I would highly recommend this material.”
Dr Clem Sullivan, Waterfront Dental Clinic, Co Westmeath

“We are a small NHS practice who are required to keep costs low. We have used a rival’s composite for years as it was cheap and it did what we wanted it to do. However the price of Filtek Z500 is comparable, if not cheaper. As for its usability, aesthetics and marginal finish – there is no comparison. Z500 is a clear winner. We switched immediately and have not been disappointed.”
Dr David Ayre, Frodsham Dental Practice, Cheshire

“I find Filtek Z500 to have excellent handling properties. It doesn’t stick to instruments and polishes well, with great aesthetics.”
Dr Patrick Carey, Onslow Gardens Dental Practice, Cork

The 3M ESPE Z-Line
Z100™ MP Restorative, the first restoration in our Z-family, was designed to deliver excellent strength and abrasion resistance. The next generation, Filtek™ Z250 restorative was enhanced for lower shrinkage. Now our latest addition to the Z-family, Filtek Z500, features nanofiller technology for easier sculpting2, reduced stickiness3 and even better polish retention4 – at a price to smile about.

Z150™ MP Restorative was designed to deliver excellent strength and abrasion resistance. The next generation, Filtek™ Z250 restorative was enhanced for lower shrinkage. Now our latest addition to the Z-family, Filtek Z500, features nanofiller technology for easier sculpting2, reduced stickiness3 and even better polish retention4 – at a price to smile about.

*Based on placing 25 fillings per week, 48 weeks a year. Prices taken from Dental Directory Price Watch, Issue 22. Savings calculated based on refills of 20 capsules of Spectrum TPH, shade A3 at £45.70 vs. 20 capsules of Filtek Z500 Restorative, shade A3 at £32.79.
