

2018 Course Overview

Fall Protection Training: elevated.

Protecting workers at height takes more than just bare-minimum training. That's why 3M Fall Protection offers comprehensive training and education to fit your needs. Clear and effective methodologies. Proven adult learning techniques. A wide variety of options and subject matter. It's all part of how our team of skilled personnel helps you not only meet regulatory compliance, but also helps keep workers safe.

- A dedicated team with backgrounds in confined space, rescue, fire and safety and bilingual capabilities.
- Three state-of-the-art training facilities and eight satellite locations in the US.
- Training conforms to the provisions established by applicable standards, such as ANSI, OSHA, CSA, MSHA, EM385 and CE.

For other 3M PPE Training and Education opportunities, visit 3M.com/WorkerSafety.

Comprehensive training, when and where you need it.

The key to effective fall protection training is practical, hands-on experience. We offer a full range of fall protection and industrial rescue courses on-site or at one of our state-of-the-art training centers located throughout North America.

- **Open Enrollment Courses:** Designed to help provide training for your workplace.
- **Specialty Courses:** Tailored for a particular trade or an industry's work requirements, such as Confined Space Entry and Retrieval, Oil Field Rig Workers Awareness, Rig Rescue, Tower Climbing/Rescue, Mining and Wind Energy Fall Protection and more.
- **On-Site Training:** Allows us to bring any course in our portfolio to your site and tailor it to help you meet your specific application needs.
- **Demo Vehicles:** Nearly 50 trucks in North America available to augment training with vital hands-on experience through on-site demonstrations.

Online educational resources, available 24/7.
