Dentists everywhere love using it anywhere.
600 million reasons you can be confident using it anywhere.

Bring unsurpassed esthetics and outstanding strength to every restoration—anterior or posterior—with 3M™ Filtek™ Supreme Ultra Universal Restorative.

As you’d expect from the global leader in esthetic and restorative technologies, 3M’s TRUE nanotechnology provides superior wear resistance and gloss retention ... so your restorations will last and look beautiful, too.

That’s why dentists around the world have made it their composite of choice for more than 600 million restorations* ... and counting.

Simplify your practice with the composite that does it all.

Any place: anterior or posterior. Any class.

A versatile choice is a smart choice.

Unsurpassed esthetics
• Excellent polish retention
• Wide range of shades and opacities
• Natural-looking fluorescence

Simple to use
• Exceptional handling
• Natural-looking body shades for a simple, single-shade technique
• Capsules and syringes are color coded by opacity

Durable in anterior and posterior use
• Excellent wear resistance
• Outstanding strength
• High radiopacity

*3M™ Filtek™ Supreme Universal Restorative line
Unsurpassed polish retention—a difference you can see.

The initial gloss of most restoratives can be very impressive, but you want a polish that lasts. Thanks to 3M’s TRUE nanofiller technology, Filtek Supreme Ultra restorative polishes easily and retains its natural gloss better than other composites—even a microfill.
When you want a simple solution, you’ll love this.

Most restorations are made with just one of eight Body shades. By using 3M™ Filtek™ Supreme Ultra Universal Restorative, it’s truly possible to create natural-looking restorations using a simple, single-shade technique.

Dentists say they love the way Filtek™ shades blend with surrounding dentition. Add to that the high gloss provided by 3M’s TRUE nanotechnology, and you’ll find it really easy to satisfy patient expectations.

“Go-to” Body Shades

Filtek™ shades match the VITA classical Shade Guide. An A2 is an A2, so esthetics are beautifully predictable.

Dentists rate the handling as “ideal.”

It’s easier to achieve the restorative result you want when the composite handles well. For example, the improved handling of our Translucent shades makes it easier to create lifelike incisal edges.

All of our shades offer excellent handling. In fact, in a field study,* dentists rated Filtek Supreme Ultra restorative as “ideal” on viscosity, stickiness, flow and ability to hold its shape.

*3M internal data
Simply durable ... anywhere

Beautiful ... yes. And it’s strong enough to use anywhere.

Think how much more efficient your day would be if you didn’t have to decide which composite to use in each clinical situation. Our TRUE nanotechnology gives 3M™ Filtek™ Supreme Ultra Universal Restorative remarkable strength for anterior and posterior use.

Excellent wear resistance

The lower the wear rate of a composite material, the better its wear resistance. In an in vitro 3-body wear test, Filtek Supreme Ultra restorative had the lowest wear rate of all leading composites tested.

Source: 3M internal data

Outstanding strength

In a test comparing leading dental composites, the flexural strength of Filtek Supreme Ultra restorative proved better than that of EsthetX® HD, Herculite™ Ultra and Tetric EvoCeram®, and comparable to other composites tested.

Normalized wear rate

3M™ Filtek™ Supreme Ultra Universal Restorative \(\ldots\) 1.0
Grandio®SO \(\ldots\) 1.4
EsthetX® HD \(\ldots\) 1.6
TPH Spectra® HV \(\ldots\) 2.6
Tetric EvoCeram® \(\ldots\) 3.4
Herculite™ Ultra \(\ldots\) 2.5

Over 200,000 cycles

3M’s TRUE nanofiller technology leads to outstanding polish and strength.

The significant distinction between 3M™ Filtek™ Supreme Ultra Universal Restorative and micro- and nanohybrids is that our nanoparticles are uniquely formed in the nano size range and are not the result of a grinding process. Some nanoparticles are fused into nanoclusters, which shear at a rate similar to the wear of the surrounding resin matrix during abrasion, such as toothbrush abrasion. That’s why restorations made from Filtek Supreme Ultra restorative maintain a smooth surface gloss for superb esthetics.

The nanoclusters have a similar size range as fillers found in the hybrid composites and provide for high filler loading. This results in excellent physical properties and wear resistance that are ideal for posterior restorations.
