Extended fluoride release varnish ... because staying in contact matters.
Most patients don’t know the benefit of keeping a fluoride varnish in contact with their teeth longer.

Studies show the longer a fluoride varnish stays in contact with the teeth, the more effective it is.*

That’s why 3M formulated Vanish White Varnish to stay on the teeth longer for more effective protection.

- Durable, long-lasting coating
- Releases more fluoride after 4 hours than other leading varnishes, continuously releasing up to 24 hours

Extended-release formula allows fluoride, calcium and phosphate to be released over a longer period, allowing absorption into the tooth.

Contains 22,600 ppm fluoride and tri-calcium phosphate. Minerals found in saliva for building strong teeth.

Advanced varnish with proven protection is fast and easy to apply.

Simply swipe 3M™ Vanish™ 5% Sodium Fluoride White Varnish across tooth surfaces and let the formula do the rest.

- No need to dry the teeth—sets in the presence of saliva
- No rinsing—the patient may eat and drink immediately after the application
- Saliva-tolerant—spreads to help coat even more tooth surfaces, releasing fluoride, calcium and phosphate for up to 24 hours

Dispense Vanish White Varnish onto a mixing surface. For easy application, squeeze it onto the gloved hand like a painter’s palette, so you can efficiently deliver varnish to the patient.

Apply Vanish White Varnish evenly in a thin layer over treatment area(s) with sweeping, horizontal brush strokes. No suction required.

Summary of advantages

- Extended fluoride release—22,600 ppm sodium fluoride
- Contains calcium, phosphate and xylitol
- Easy to apply, no drying needed
- Can be applied to tooth surfaces where plaque is present
- Fast, horizontal sweep application
- Unique applicator for back-of-glove dispensing
- Does not change the appearance of ceramic or metal orthodontic brackets
- Relieves hypersensitivity
- Over 10 years of clinical success
It’s the varnish that won’t leave their teeth when they leave your chair.

3M™ Vanish™ 5% Sodium Fluoride White Varnish is virtually invisible on teeth. It leaves a durable, thin coating that adheres to the teeth until it’s brushed off, creating long-lasting, acid-resistant protection to relieve hypersensitivity.

Proven, advanced protection you can’t see.

Immediately after Vanish White Varnish was applied.
