

GEOMETRIC DECORATIONS

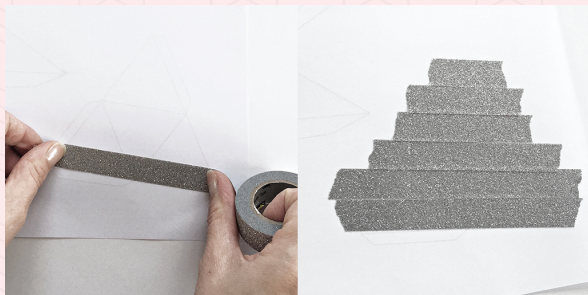

WITH SCOTCH® EXPRESSIONS GLITTER TAPE

BY CLEVER POPPY

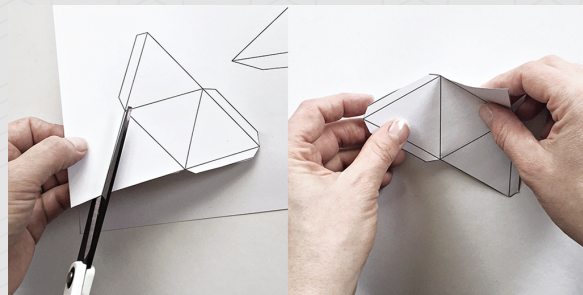

It's so fun and easy to make these cool geo glitter decorations! You will need: print-outs of the geometric shape templates, Scotch® Expressions Glitter Tape, Scotch® Scissors, double sided tape (with backing paper), a needle and thread. You can download my shape templates and get more detailed instructions by visiting my blog at www.cleverpoppy.nz. Have fun!

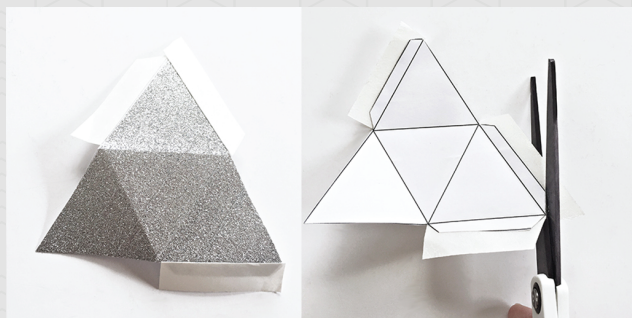

Step One: Turn the template face down and cover the shape with rows of glitter tape, then press tape down firmly.

Step Two: Turn over the template (so that the glitter side is facing down) and cut it out. Then fold all of the edges inwards.

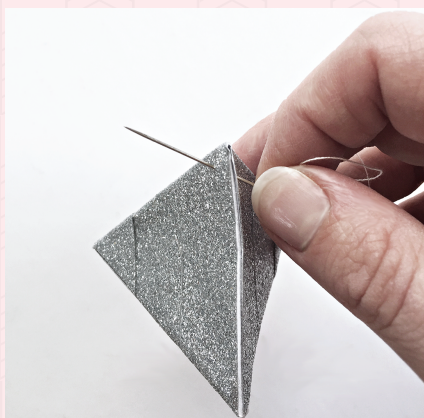

Step Three: Attach the double sided tape to the tabs on the template, on the glitter side. Trim to fit and then press it firmly down.

Step Four: Now it's time to stick the template into a 3D shape. One tab at a time, remove the backing paper and stick the tab to the underside of the corresponding join.

Step Five: Use your needle and thread to run some thread through the top point of the decoration. Tie a loop in the thread and use this to hang the decorations with. All done!
