SEALED-BLOK™ SELF RETRACTING LIFELINES

TRUSTED. DURABLE. RELIABLE.

- FIELD PROVEN TECHNOLOGY
- RSQ™ FEATURE
- 420 LB. CAPACITY
- RETRIEVAL CAPABILITIES
TYPICAL MARKETS
- Oil and Gas
- Off-Shore Wind Energy
- Mining
- Marina
- Utilities
- Municipalities
- Waste Water Treatment

TYPICAL APPLICATIONS
- Offshore Platform Access
- Confined Space
- Saltwater Environments
- Dirty Environments

WHY A SEALED-BLOK™?

TRUSTED
Capital Safety continues to set the standard for quality fall protection. The DBI-SALA® Sealed-Blok™ family has the most comprehensive line of sealed SRLs in the industry and decades of proven field experience.

DURABLE
- Stands up to the harshest environments!
- Heavy-duty design
  - Corrosion resistant
  - Stainless steel end-plates
  - Aluminum housing
- Certified for horizontal applications

RELIABLE
- Dynamic components sealed inside the housing (IP68 rated)
  - Protected against complete or continuous submersion in water
  - Protects from particles entering product
- Decades of service
- Field proven in the world’s toughest environments
- Design extends maintenance intervals and product longevity

RSQ™ DUAL-MODE Built-In Rescue Operation

No other brand has the exclusive DBI-SALA® dual-mode descent operation! Our RSQ™ feature allows the user, prior to connection, to choose their mode of operation. This two-in-one operation lowers the cost of ownership by reducing the need for separate rescue equipment.

FEATURES:
- Standard fall arrest mode
- Automatic descent mode
- Remote/Assisted descent activation options

CHOOSE YOUR MODE

FALL ARREST MODE
(Assisted Rescue):
A speed sensing brake stops the fall, reduces forces imposed on the user to safe levels of 900 lbs. or less and allows for assisted rescue to take place.

AUTOMATIC DESCENT MODE
(Self Rescue/Descent):
A speed sensing brake stops the fall just like in fall arrest mode, then instantly a centrifugal brake activates lowering the user at a controlled speed to the next level or ground.
MULTIPLE BUILT-IN RESCUE OPTIONS FOR SUPERIOR SAFETY

THESE ASSISTED RESCUE OPTIONS “ENGAGE” THE DESCENT MODE.

Traditional assisted rescue operations may also be conducted.

FALL ARREST MODE
Assisted Rescue by Pole

FALL ARREST MODE
Assisted Rescue by Hand

AUTOMATIC DESCENT MODE
Self Rescue/Descent
CONFINED SPACE RESCUE AND RETRIEVAL

THE MECHANICAL DEVICE is one of the most critical parts of a rescue system. It provides the means to retrieve an incapacitated worker to safety. Lifeline type and length are just a few of the options. A 3-way retrieval SRL can be used as either a primary or secondary device depending upon your application.

3-WAY RETRIEVAL SRL MODELS

FEATURES:
- Raise and lower personnel or materials
- Simple change in/out of Retrieval
- Stow away handle
- Optional bracket for davit attachment
- Available with RSQ™ Option
- For rescue use only

Safety engineers and site directors trust DBI-SALA® for the type of high quality, rugged systems that will ensure top performance when it is needed the most. Our systems meet applicable industry standards. We also customize solutions to suit customer needs.

FAST-LINE™ FIELD REPLACEABLE LIFELINE MODELS

FEATURES:
- Provides trained end-users with the ability to replace lifeline
- SRL will not operate if rebuilt improperly
- No need to break seal to replace lifeline
- Lowers overall cost of ownership

3-way models with built-in emergency retrieval and mounting brackets are ideal for confined space rescue. Available with and without mounting brackets.
Some of our most popular Sealed-Blok™ accessories are shown below—including RSQ assisted rescue tools, anchorage connectors, mounting brackets and Fast-Line™ cable assemblies.
Check out our website at www.capitalsafety.com for further details.
