3M™ Boron Nitride Cooling Fillers

Introduction
3M™ Boron Nitride Cooling Fillers are engineered to improve thermal conductivity in polymers while maintaining or improving electrical insulation. Their unique properties make these additives suitable for many thermoplastic, elastomer and thermoset resins used in a wide variety of electrical and electronic applications – including thermal interface materials (TIM), consumer electronics and automotive applications. 3M Technical Ceramics offers a family of boron nitride cooling filler materials:

- 3M™ Boron Nitride Cooling Filler Platelets: powders of highly crystalline single platelets
- 3M™ Boron Nitride Cooling Filler Agglomerates: soft, randomly oriented aggregated platelets
- 3M™ Boron Nitride Cooling Filler Flakes: hard, oriented aggregated platelets

3M™ Boron Nitride
3M™ Boron Nitride is a versatile ceramic material offering thermal conductivity, temperature stability, chemical resistance, high reflectivity, lightweighting and electrical insulation. The structure of layered hexagonal plates provides outstanding lubricating properties and is non-abrasive to tooling. 3M boron nitride products are manufactured at fully dedicated, ISO 9001- and 14001-certified facilities. Our manufacturing processes are optimized for quality, efficiency and consistency – helping ensure reliable and repeatable product performance.

Expertise in Production - and Customer Service
Our experienced specialists will work with you to develop and optimize custom boron nitride products for your application. The particle size, powder morphology and chemical composition of 3M boron nitride can be tailored to your specific requirements. We are ready to assist you with initial design and development, and our extensive and well-equipped manufacturing facilities allow us to quickly scale-up to full production.

For more information, contact us at 1-800-367-8905.

Typical Physical Properties

* Platelets CFP 003, 003E and 003SF: O ≤1.1%
  Platelets CFP 001: O ≤1.2%
  Agglomerates CFA 250S: O ≤10.0%

** Platelets CFP 012P: C ≤2.0 %

*** Platelets CFP 001 and 003SF: B₂O₃ ≤0.2%

**** BN content is calculated as (100% minus B₂O₃, O, C, O, Si, Al, Fe, Ca, without loss on drying)
  Platelets CFP 001, 003, 003E and 003SF:
  BN ≥98.0%
  Platelets CFP 012P: BN ≥97.0%
  Agglomerates CFA 250S: BN ≥80.0%, contains an inorganic binder
3M™ Boron Nitride Cooling Fillers – Grade Profiles

3M™ Boron Nitride Cooling Filler Platelets CFP 001 and 003SF
Preferred for thin films <25 µm and fibers, fine channels and windings. CFP 003SF has a controlled top size.

3M™ Boron Nitride Cooling Filler Platelets CFP 003E, 003, 006, 0075, 009 and 012
Optimal all-purpose grades for pads and injection molded parts.

3M™ Boron Nitride Cooling Filler Platelets CFP 007HS
Ideal for thin films <50 µm due to its controlled top size. Highest reflectivity and increased in-plane thermal conductivity in pads.

3M™ Boron Nitride Cooling Filler Granulated Platelets CFP 012P
Spray-dried boron nitride platelets for excellent processability, flowability and high dosing velocities for extruded and injection molded parts.

3M™ Boron Nitride Cooling Filler Agglomerates CFA 250S
Soft agglomerates for high filler loadings. Excellent processability, flowability and high dosing velocities. Best fit for silicone TIMs.

3M™ Boron Nitride Cooling Filler Agglomerates CFA 50M
Mix of agglomerates, platelets and boron nitride clusters. Excellent for potting resins.
3M™ Boron Nitride Cooling Filler Flakes CFF 500-3 and 200-3
Highest through-plane thermal conductivity. Boosts thermal conductivity of compounds as secondary filler.

SEM micrograph: Grade CFF 500-3

SEM micrograph: Grade CFF 500-15

3M™ Boron Nitride Cooling Filler Flakes CFF 500-15 and 200-15
Preferred for lowest viscosity in epoxies and silicones. High thermal conductivity.

Bulk density determined according to ASTM B329/ISO 3923-2 (Scott density) and according to ISO 23145-2 (DIN density)

Particle size distribution measured by laser light scattering
(Mastersizer 2000, dry, 0.1 bar)

** Data determined by means of SEM pictures

*** Can include soft agglomerates with 50–100 µm

For calculation purpose: Density of bulk hBN 2.25 g/cm³
Packaging

3M™ Boron Nitride Cooling Fillers are available as 1 kg samples (maximum sample quantity 10 x 1 kg) or in the following packaging sizes:

- **Platelets CFP 001 and 003SF**
  - Standard Drum: 10 kg
- **Platelets CFP 003E, 003, 006, 007HS, 0075, 009 and 012**
  - Standard Drum: 20 kg
- **Platelets CFP 012P**
  - Standard Drum: 25 kg
- **Agglomerates CFA 50M and 250S**
  - Standard Drum: 25 kg
- **Flake Grades CFF**
  - Standard Drum: 25 kg

Product Storage, Handling and Safety

The substance boron nitride contained in the products 3M™ Boron Nitride Cooling Fillers (all grades) has been duly registered in conformance with REACH obligations according to EC directive 1907/2006 (see product Safety Data Sheet for registration number).

Unless mentioned differently, the products contain less than 0.1 wt % Diboron Trioxide (substance of very high concern – SVHC, technically unavoidable impurity, see SDS).

The products do not contain any other SVHC substance of the actual SVHC candidate list.

Warranty, Limited Remedy, and Disclaimer: Many factors beyond 3M’s control and uniquely within user’s knowledge and control can affect the use and performance of a 3M product in a particular application. User is solely responsible for evaluating the 3M product and determining whether it is fit for a particular purpose and suitable for user’s method of application. User is solely responsible for evaluating third party intellectual property rights and for ensuring that user’s use of 3M product does not violate any third party intellectual property rights. Unless a different warranty is specifically stated in the applicable product literature or packaging insert, 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY OF NON-INFRINGEMENT OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. If the 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M’s option, replacement of the 3M product or refund of the purchase price.

Limitation of Liability: Except where prohibited by law, 3M will not be liable for any loss or damages arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.
