

**Servicing company?  
We've got your water  
filtration needs covered.**

# Why Supply Water Filtration Solutions?

Pubs and high-street restaurants are increasingly turning to professional servicing companies for water filtration solutions, as well as for advice regarding which products on the market are best suited to meet their needs.

By offering affordable and reliable water filtration solutions, servicing companies can not only help add a new revenue stream to their business, but also help save their customers money, keeping them returning in the future.

It's therefore vital that servicing companies also understand the different problems these devices can be used to address, and the different ways that they can benefit businesses such as pubs and high-street restaurants.

One of the main reasons that businesses use water filtration systems is to reduce limescale, the build-up of high calcium and magnesium levels, also referred to as hard water, which affects more than 60 per cent of the UK.

Another reason that pubs and high-street restaurants use water filtration devices, is to remove unpleasant tastes and odours from the mains water supply. Such effects can be caused by naturally occurring organic material, along with chlorine and chloramines, which are used by utility companies to clean the water.

Water filtration cartridges that use carbon block technology can help with this problem. As well as improving the taste and smell of everything from coffee to steamed food, they can help to create taste consistency across outlets.

3M is a one-stop shop, with multiple technologies and a huge range of filters to suit any pub or high-street restaurant need. With years of experience in the water filtration sector, 3M's experts are on hand to recommend bespoke solutions and provide helpful advice every step of the way.

## Did you know...

**~60%**  
of the UK is  
affected by scale

## Scale can lead to a...

**30-50%**  
decrease in  
the lifespan of  
equipment

## The benefits of filtration:

Filtration helps your customers to produce consistently high quality beverages & food, whilst protecting their expensive foodservice equipment against scale, improving customer satisfaction and repeat business.

3M™ Filtration Products with Sanitary Quick Change technology helps improve change-out efficiency, reducing service call out duration and time out on the road, thus saving you money.

3M™ Filtration products utilise Sanitary Quick Change (SQC) technology, allowing cartridges to be removed and replaced with a simple 1/4 turn, without the need to shut off the water supply!

**No hassle. No mess.**

## 3M™ HF Range

HF Bev

HF Brew

HF Ice

- ▶ Multiple ranges to suit multiple applications
- ▶ Sediment and Chlorine taste and odour reduction
- ▶ Suitable for soft water areas
- ▶ Scale inhibition, cyst and bacteria reduction options available
- ▶ High capacity - up to 200,000L in one cartridge

## 3M™ ScaleGard™ Pro Range

- ▶ Wide range, suitable for most applications
- ▶ Sediment and Chlorine taste and odour reduction
- ▶ Suitable for hard water areas
- ▶ Features scale removal technology to protect equipment
- ▶ Available with unbuffered resin for a higher capacity and bypass versions

## 3M™ ScaleGard™ Blend Range

- ▶ Wide range, suitable for most beverage applications
- ▶ Sediment, Chlorine and Chloramine taste and odour reduction
- ▶ Suitable for hard water areas
- ▶ Compatible with 3M™ ScaleGard™ Blend Series of heads for custom water quality
- ▶ Available with filtration monitor to track cartridge status and life cycle
- ▶ Features scale removal technology to help protect equipment
- ▶ Available with unbuffered resin for a higher capacity

## 3M™ SGLP2 Reverse Osmosis

- ▶ Suitable for most applications
- ▶ Feed multiple applications with one filter system
- ▶ Tailor water hardness and quality to meet desired taste and application requirements
- ▶ Self cleaning membrane helps reduce replacement frequency
- ▶ Sediment, Chlorine and Chloramine removal capabilities
