Applied to Life.™

The tool room

A guide to equipping your
gear with the right fall
protection for tools.

Preventing injury from dropped tools

Tools dropped from a height pose a risk not only to workers and others directly below, but to anyone in the area. Through direct impact or deflection, a dropped tool or object can lead to a life-changing injury or even a fatality. By utilizing available fall protection—using anchors and connectors specifically designed to attach tools and objects to a worker or structure—the risk of these dropped object accidents can be greatly reduced.

To help you choose the right fall protection product for the tools and objects on your worksite, we have developed a convenient reference guide for your use.

To learn more about the complete line of 3M™ DBI-SALA® Fall Protection for Tools product line and how to use them, download our [**pocket reference guide.**](#)

Caulking Guns

Up to 5 lbs. with pre-drilled holes.

Chisels

Chisels up to 1 lb. and concrete chisels up to 5 lbs.

Clamps and Grips

Bar clamps, bridge clamps and C-clamps

Cutting Knives, Scissors and Snips

Aviation snips, linoleum knives, end cutters, utility knives and scissors

Drills

Electric drills and magbase drills up to 80 lbs.

Files

Files up to 1 or 2 lbs., with or without pre-drilled holes

Grinders

Right angle grinders or similar tools up to 35 lbs.

Hammers

Ball peen, beater, chipping, claw, sledge and soft face hammers

Handheld Radios

Handheld radios up to 2 lbs.

Levels

Magnetic levels of up to 2 and 5 lbs.

Pipe Cutter and Thread Drives

Pipe cutters up to 2 lbs. and power drives of up to 35 and 80 lbs.

Pliers

Channellock, lineman, needlenose and side cutting pliers/snips

Putty Knives

Putty knives of up to 2 and 5 lbs.

Ratchets

Drive ratchets up to 35 lbs.

Saws, Hacksaws and Sawzalls

Circular saws, bandsaws, electric Sawzalls and hacksaws

Seamers

Hand seamers up to 2 lbs.

Scrapers

Scrapers up to 2 lbs.

Screwdrivers

Screwdrivers up to 1, 2 or 5 lbs., with or without pre-drilled holes

Sleever Bars

Sleever bars up to 35 lbs.

Spark Tool/Flint Striker

Spark tools for use by welders

Squares

Combination and contractor squares up to 2 and 5 lbs.

Tape Measures

Tape measures up to 2 lbs.

Wire Brush

Wire brushes up to 2 or 5 lbs., with or without pre-drilled holes

Wire Strippers

Wire strippers up to 1 or 2 lbs., without pre-drilled holes

Wrecking Bar

Bars up to 35 lbs.

Wrenches

Adjustable, pipe, impact, box, chain, combination, scaffold, slugging, spud and valve wrenches

Caulking Guns

Products used: 3M™ DBI-SALA® D-ring Cord—Tools up to 5 lbs. (2.3 kg)

A D-Ring Cord creates a simple, secure and reusable attachment point for tools with pre-drilled holes or closed handles weighing up to 5 lbs. (2.3 kg).

[Find Attachment Point products on our website](#)

Chisel, up to 2 lbs. Products used: 3M™ DBI-SALA® D-ring (0.5" X 2.25") and Quick Wrap Tape II—Tools up to 2 lbs. (0.9 kg)

D-Rings plus Quick-Wrap Tape create an instant attachment point, with load ratings ranging from 2 lbs. (0.9 kg) up to 5 lbs. (2.3 kg) depending on model. Quick-Wrap Tape wraps around the D-Ring Attachment and conforms to the shape of the tool once it's stretched.

[Find Attachment Point products on our website](#)

Chisel, up to 1 lb.

Products used: 3M™ DBI-SALA® Quick Spin—Tools up to 1 lb. (0.5 kg)

A Quick Spin is a small, reusable tube-shaped sleeve that can be applied to common hand tools (such as screwdrivers) weighing up to 1 lb. (0.5 kg) to make them tether-ready.

[Find Attachment Point products on our website](#)

Concrete Chisel, up to 2 lbs. Products used: 3M™ DBI-SALA® D-ring (0.5" X 2.25") and Quick Wrap Tape II—Tools up to 2 lbs. (0.9 kg)

D-Rings plus Quick-Wrap Tape create an instant attachment point, with load ratings ranging from 2 lbs. (0.9 kg) up to 5 lbs. (2.3 kg) depending on model. Quick-Wrap Tape wraps around the D-Ring Attachment and conforms to the shape of the tool once it's stretched.

[Find Attachment Point products on our website](#)

Concrete Chisel, up to 5 lbs. Products used: 3M™ DBI-SALA® D-ring (1" x 3.5") and Quick Wrap Tape II—Tools up to 5 lbs. (2.3 kg)

D-Rings plus Quick-Wrap Tape create an instant attachment point, with load ratings ranging from 2 lbs. (0.9 kg) up to 5 lbs. (2.3 kg) depending on model. Quick-Wrap Tape wraps around the D-Ring Attachment and conforms to the shape of the tool once it's stretched.

[Find Attachment Point products on our website](#)

Bar Clamp, up to 2 lbs. without pre-drilled holes

Products used: 3M™ DBI-SALA® D-ring (0.5" x 2.25") and Quick Wrap Tape II—Tools up to 2 lbs. (0.9 kg)

Quick-Wrap Tape wraps around the D-Ring Attachment and conforms to the shape of the tool once it's stretched.

[Find Attachment Point products on our website](#)

Bar Clamp, up to 5 lbs. with pre-drilled holes

Products used: 3M™ DBI-SALA® D-ring Cord—Tools up to 5 lbs. (2.3 kg)

A D-ring Cord can be fitted onto many Bar Clamps with pre-drilled holes. It is important that the Tool Cinch be fitted around a part of the tool where there is no risk of the attachment point slipping off.

[Find Attachment Point products on our website](#)

Bar Clamp, Sliding, up to 35 lbs.

Products used: 3M™ DBI-SALA® Tool Cinch Medium Duty - Single Wing, Quick Wrap Tape II—Tools up to 35 lbs. (15.9 kg)

For heavier tools, consider using a Tool Cinch. Once applied, it creates a tether ready attachment point. Quick-Wrap Tape wraps around the stabilization wing of the Tool Cinch and conforms to the shape of the tool once it's stretched.

[Find Attachment Point products on our website](#)

Bar Clamp, up to 2 lbs. with pre-drilled holes

Products used: 3M™ DBI-SALA® Quick Ring—Tools up to 2 lbs. (0.9 kg)

Some Bar Clamps have pre-drilled holes that are compatible with Quick Rings. Quick Rings are an economical and simple attachment point solution for hand tools weighing up to 2 lbs. (0.9 kg).

[Find Attachment Point products on our website](#)

Bridge Clamp, up to 5 lbs. Products used: 3M™ DBI-SALA® Tool Cinch Medium Duty - Dual Wing, Quick Wrap Tape II—Tools up to 5 lbs. (2.3 kg)

For heavier tools, consider using a Tool Cinch. Once applied, it creates a tether ready attachment point. Quick-Wrap Tape wraps around the stabilization wing of the Tool Cinch and conforms to the shape of the tool once it's stretched.

[Find Attachment Point products on our website](#)

C-Clamp, up to 5 lbs. Products used: 3M™ DBI-SALA® Tool Cinch Medium Duty - Dual Wing, Quick Wrap Tape II—Tools up to 5 lbs. (2.3 kg)

For heavier tools, consider using a Tool Cinch. Once applied, it creates a tether ready attachment point. Quick-Wrap Tape wraps around the stabilization wing of the Tool Cinch and conforms to the shape of the tool once it's stretched.

Box Wrench, rotating attachment

Products used: 3M™ DBI-SALA® Quick Ring—Tools up to 2 lbs. (0.9 kg)

A Quick Ring can be fitted around a Box Wrench as long as there is no risk of the ring slipping off either end of the tool (multiple Quick Ring sizes are available). This is an ideal attachment point for Box Wrenches as it allows for the Quick Ring to rotate and move which helps prevent tangles, and stays out of the way of the user.
