Adhesives with staying power

Medical device manufacturers and engineers need long-term wear adhesive solutions that increase patient comfort and provide strong and reliable bonds in challenging applications when adhering to skin.

That is why we designed our new family of extended wear adhesives for wearable medical device applications. These new additions join our family of go-to products, giving design engineers even more skin-friendly options.

3M 4076 Extended Wear Medical Tape

Our “go-to” products for wearable medical device applications*

* Length of wear time can vary on application, thickness, area on body, and age of user.

** Breathability may be impacted by substrate used.

Material selection and partner selection go hand in hand.

It's simple: as your partner from the start, 3M can help make your material selection process a whole lot easier.

We offer a wide variety of adhesive, backing and tape construction options for different manufacturing processes and patient populations. From highly active patients to those with fragile skin, we can help you select components that both function well together and maintain skin integrity.

As a collaborative partner with decades of experience and global leadership, we also offer supply chain traceability, ISO:13485 operating standards, ISO:10993 biocompatibility testing and validated manufacturing equipment.

No problem is too big or too small for our team of experts to tackle.

**Working together, we can help your customers
Wear It Well.**
