# Cuts time, not standards.

3M™ Automotive Aftermarket Division.

A worker in a white 3M protective suit and safety gear is using a power sander on the hood of a car in a factory setting. The worker is wearing a white hooded suit with a red 3M logo on the chest, safety glasses, and a respirator mask. The background shows a factory environment with a clock on the wall and large windows.

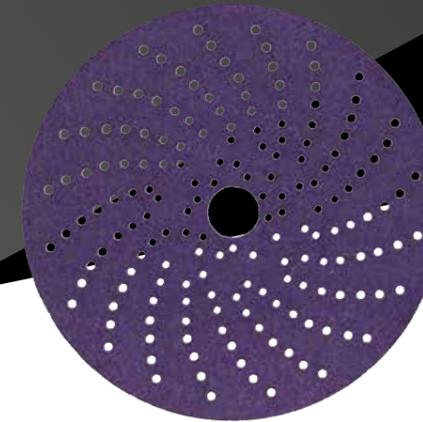

# Helping you to be more productive than ever.

## Cuts quicker, lasts longer.

Make more of your time with the 3M™ Premium Abrasives range. These products are packed with 3M innovation, the discs and sheets sand faster, help reduce cycle time and provide a consistent finish that you can count on, higher-quality repairs and less rework. They cut quicker and last longer, helping you be more productive than ever.

# Leading the way.

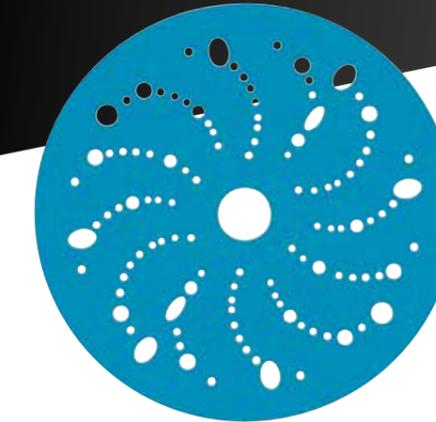

Our continuous abrasive grain innovation ensures a **faster cut**, **better finish** and **longer life**.

## 3M™ Cubitron™ II Hookit™ Clean Sanding Abrasive Discs 737U.

3M Cubitron II Hookit Clean Sanding Discs feature 3M Precision Shaped Ceramic Grain, a revolutionary advancement in abrasive technology.

Cubitron II Clean Sanding Hookit Discs deliver excellent performance during paint removal, body filler shaping, feather edging, and primer sanding. The triangular shaped ceramic mineral is designed to slice through the substrate, rather than gouging or ploughing like conventional abrasives, resulting in a disc that cuts up to 30% faster and lasts up to 2x longer.

## 3M Hookit Blue Abrasive Discs 325U.

3M Hookit Blue Abrasive Discs 325U use a blend of 3M's engineered Precision Shaped Grains (PSG) and ceramic minerals to deliver best-in-class cut and disc life.

Remove paint or sand primer prior to basecoat application with 3M Hookit Abrasive Disc 325U. Our blue aluminium oxide abrasive blue discs 325U are designed to offer excellent cutting performance and a perfect result from paint removal to preparation. Our 3M Hookit Blue Abrasive Discs 325U have multi-hole technology for superior dust extraction.

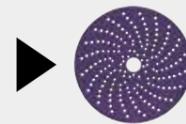

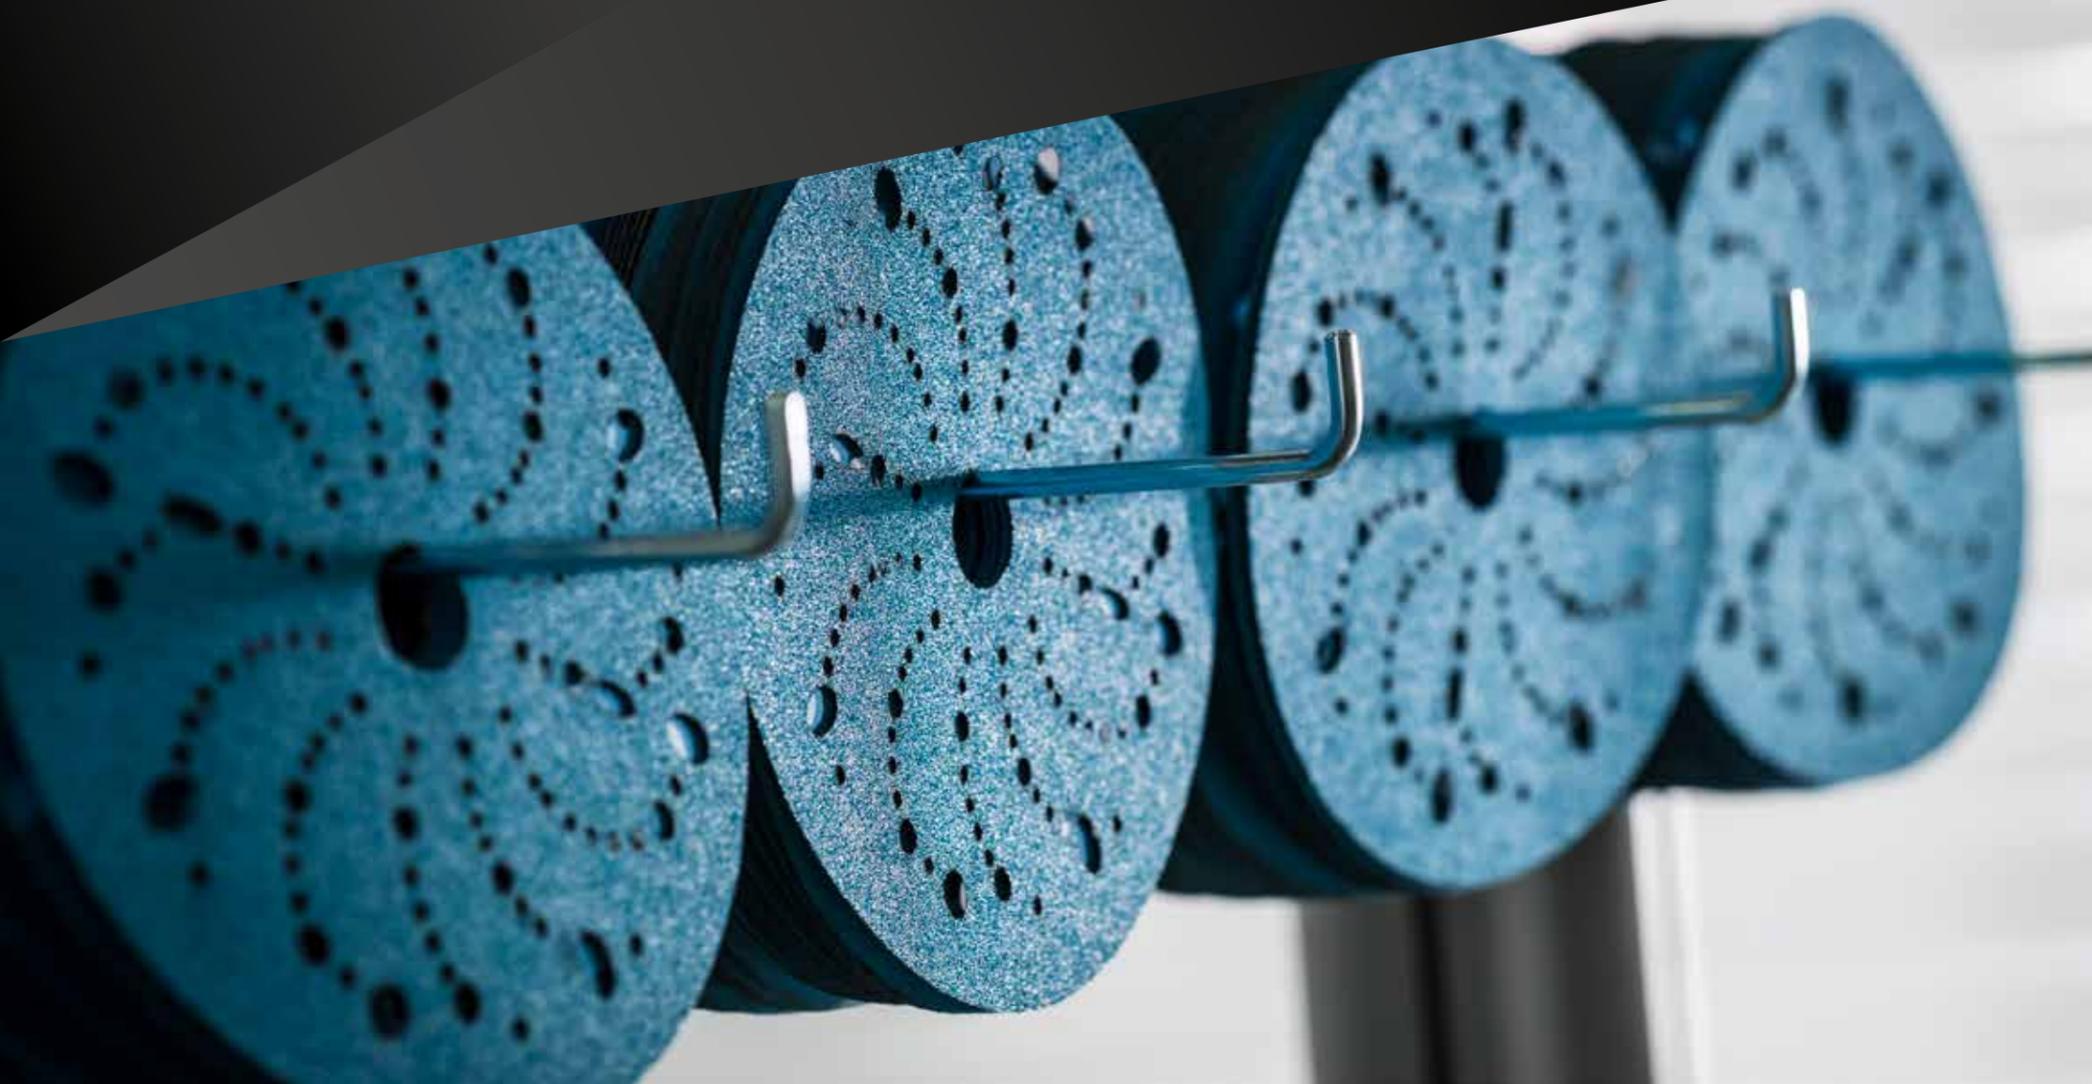

## 3M Hookit Purple Finishing Film Abrasive Discs 260L.

Our 3M Hookit Purple Finishing Film Abrasive Disc 260L features an updated coating that levels surface defects on clear coat and greatly reduces pigtailed. Aluminium oxide abrasive cuts fast and lasts a long time.

3M Hookit Purple Finishing Film Abrasive Discs 260L are built onto a durable film backing that adds conformability, and our specially formulated coating helps preserve the life of the aluminium oxide mineral. The 260L discs are ideal for levelling orange peel, dust nibs or paint runs in all types of automotive paint, gel coat and clear coat.
