

3M™ Vehicle Air Purifier Plus

Purifies your car
in minutes*.

Gets rid of Bad Odor
caused by food, sweat and
other sources

**Removes
harmful gases**
in your car

Reduces nausea
during your drive

**Reduce Allergic
Reaction**
caused by Dust inhalation

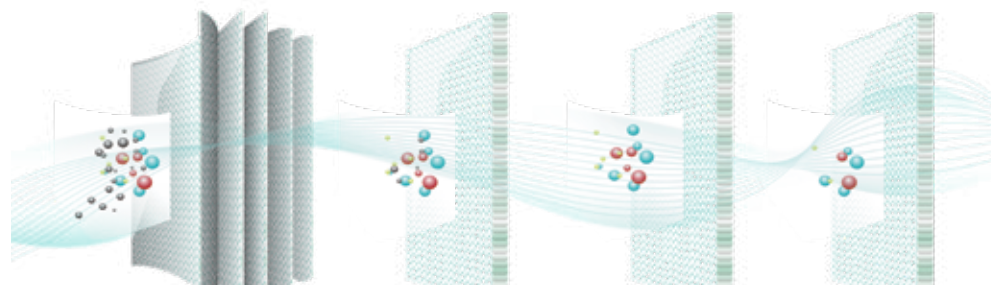

**Protects
against Haze**
and other pollutants

**Installation
services**
available

*Test conducted in a 3m³ chamber, equivalent to the interior size of a typical sedan car

Innovative Filtration Technology

01

3M Electrostatic Electret Technology

Captures hair, pet
dander and other large
dust particles

Pet
Hair Dust

02

3M Nonwoven Technology

Captures finer
particles in the air
< PM 2.5

Haze Cigarette
Smoke

03

Catalytic Activated Carbon

Removes odor and
harmful volatile organic
compounds (VOCs) via
activated carbon

Food
Smell Sweat Car
Exhaust
Smell

04

High Formaldehyde Removal

Effectively removes
formaldehyde, a
probable cancer
causing agent

Effectively Cleans all car sizes*

Sedan

SUV

MPV

Clean Air Delivery Rate (CADR)**

Dust : 11m³/H

Formaldehyde : 10m³/H

Product Information

Colors	Black, White
Accessories	Anti Slip Pad, In-Car Power Cable, Attachment Belt
Product Weight	580g without filter
Product Dimensions	20.6 cm X 17.6 cm x 7.3 cm
Noise Level	< 55 dB
Rated Voltage	12V
Rated Power	37W

Please register online at '<http://go.3M.com/VehicleAirPurifierWarranty>' to enjoy your 12 months warranty

*PM2.5 CADR: 11m³/h

**What is Clean Air Delivery Rate (CADR)?

CADR is a measure of an air cleaner's delivery of particle-free air and it is calculated from independent lab tests. To compare two air cleaners, look at the CADR rate. The higher the CADR the faster the unit cleans the air. CADR is reported in cubic feet of particle-free air per minute (CFM).

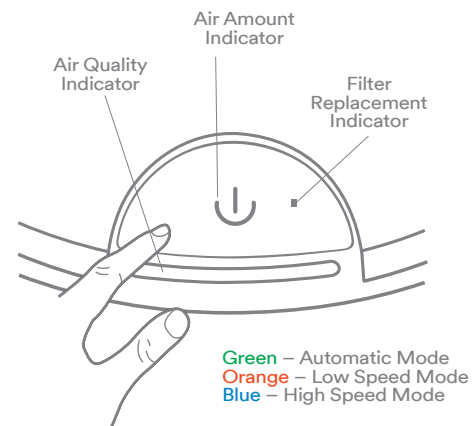

Removes

- 99% of Dust, Pet Dander & PM2.5 Particles
- 93% of Harmful Gases in your car
- Bad Odor caused by food, sweat and other sources

Smart Design

The 3M™ Vehicle Air Purifier Plus features a smart sensor panel that automatically adjusts the purification rate based on the air quality within your car.

For optimal use, the filter replacement indicator reminds you when it is time to change your filter cartridge.

Why does the air quality in your car matter?

You and your loved ones are constantly being exposed to dust, allergens and harmful gases caused by vehicle emissions, car interior chemicals, cigarette smoke, haze and even that new car smell.

This might lead to increased chances of respiratory and cardiovascular related problems, especially among children and the elderly.

Don't let your beloved car harm you!

What are you exposing your loved ones to?

Bad Odor

Bad odor from food, sweat and other stale smells can be nauseating and can even cause you to be car sick.

Germs/Allergens

From the wastes of pests such as dust mites, cockroaches lurking in your car and even from your beloved pets can trigger respiratory symptoms such as asthma.

PM 2.5 Dust Particles

Enters further into your lungs and blood stream, caused by:

- Haze
- Vehicle emissions
- Dust and Air Pollution

Formaldehyde

A cancer causing carcinogen found in

- Air fresheners/ fragrances
- Vehicle exhaust
- Cigarette smoke
- Certain upholstered car fabrics
