

Vehicle Air Purifier - Frequent Asked Questions

- **My car already has a Cabin Air Filter, is the Vehicle Air Purifier Plus really necessary?**
It all depends on your Cabin Air Filter! The vehicle air purifier plus helps to enhance the air quality in your car by removing PM2.5 particles and even bad smells that your Cabin Air Filter might not be able to!
- **What is the difference between the Vehicle Air Purifier and an Ionizer?**
The Vehicle Air Purifier actually purifies and clean up the dust and dirt in your car! With its electrostatically charged filter media, dust and dirt floating within your car interior will be attracted to the Vehicle Air Purifier. Ionizers causes cause the dust particle to be charged and stick on to surfaces, which might leave your car interior dusty.
- **Do I have to keep switching the Vehicle Air Purifier?**
Not at all! Your Vehicle Air Purifier Plus runs automatically once connected to your 12V Charging station, once you start your car, it will automatically run!
- **Will my Vehicle Air Purifier Plus continue to run after my car engine is switched off?**
Do not worry! Your Vehicle Air Purifier Plus is connected to your 12V Charging station and will typically cut off once you switch off your car engine.
- **How long does it take to clean up the air inside my car?**
That all depends on the initial air quality in your car! However based on the Vehicle Air Purifier Plus's CADR of 11m³/h, you can feel the difference in 20-30 minutes or less! Quick enough to clean your air on your way to and from home!
- **Do I have to manually switch on the Vehicle Air Purifier?**
Not at all! Your Vehicle Air Purifier Plus runs automatically once connected to your 12V Charging station, once you start your car, it will automatically run!
- **Where can I place the Vehicle Air Purifier Plus?**
With its size of 20.6cm x 17.6cm x 7.3cm, you can place it virtually anywhere in the car! Below are some of the recommended areas. However if you wish to conceal the Vehicle Air Purifier Plus – can you can place below your passenger car seat as well. It will work just as fine!

Behind passenger seat headrest

Dashboard with anti-slip pad

Center console (MPV model)

Rear package tray (Sedan model)

- **The light on my Vehicle Air Purifier Plus keeps changing color and fan speed! Is it faulty?**
Definitely not! Your Vehicle Air Purifier Plus is equipped with a smart air quality sensor that detects the air quality inside your car! It will light blue (detecting stage) for 3 minutes to detect the air and switch to green (good air quality), yellow (moderately good air quality) or red (poor air quality and adjust the fan speed accordingly depending on the quality of air in your car!
- **Can the filter be washed and reused?**
The filter in the Vehicle Air Purifier is disposable and cannot be washed.
- **How long can my filter last?**
Typically the filter will last 6-9 months, however this is also dependent on environmental settings. ie. the poorer the vehicle air quality the shorter the filter lifespan as well as the frequency and duration of the drive. The more frequent and longer your drive time, the more your Vehicle Air Purifier works for you!
