Simplifying your skin integrity needs.

Ideal use:

Manage damaged or broken skin

Protect skin from:

Irritants

Examples: Liquid stool, mixed feces/urine, gastric fluid and chronic wound exudate

At-risk or compromised skin

Examples: Limited mobility, history of recurrent breakdown, fragile skin, macerated skin, heavy to copious exudate and prolonged exposure

Routine protection

Moisture, Friction and/or Shear

Adhesives

Dryness

3M™ Cavilon™ Advanced Skin Protectant

3M™ Cavilon™ No Sting Barrier Film

3M™ Cavilon™ Durable Barrier Cream
### Finding the optimal solution for your skin integrity needs.

**Manage damaged or broken skin**

- Manage IAD
- Manage peristomal/perifistular skin damage
- Manage periwound skin damage (e.g. maceration), including compatibility of use under 3M acrylic negative pressure dressings
- Manage superficial skin damage from moisture and friction
- Manage superficial skin injury in difficult-to-dress locations
- Manage superficial skin damage (e.g. stripping, skin tears) from adhesive use, including compatibility of use under vascular access dressings

**Protect at-risk skin**

- Protect intact skin especially in the presence of diarrhea or mixed incontinence
- Protect skin around problem fecal or urinary stomas, fistulas or tracheostomies
- Protect skin around at-risk wounds (e.g. heavily draining wounds such as diabetic foot ulcers, venous leg ulcers or infected wounds)
- Protect intact skin from moisture, friction or shear

**Ideal for routine protection**

- Protect intact skin for low-risk patients
- Protect intact skin for low-risk patients
- Protect intact skin from moisture and friction
- Protect intact skin from moisture, friction or shear
- Protect intact skin from moisture, friction or shear
- Protect intact skin from adhesive products (e.g. tape, wound and vascular access dressings and ostomy products)
