Manual Tape Applicator MTA-2

3M™ Stamark™ Pavement Marking Tapes

Information Folder MTA-2 Manuel Pavement Marking Tape Applicator

November 2020

1 Description

The 3M™ Manual Tape Applicator MTA-2 is in intended to be used for the application of 3M™ Stamark™ pavement marking tapes. It is a simple-to-use, two-wheeled, robust, push-type device. (Figure 1)

The usage of A380ESD (high tack adhesive) demands installation of the MTA-2 upgrade-kit DR995032239 to prevent roll blocking by the high tack adhesive during the tape application.

Figure 1: MTA-2 Tape applicator

The device is specifically designed to apply pavement marking tapes precoated with pressure sensitive adhesive. The applicator weighs 75kg and can be partially disassembled for transporting in a van, truck or station wagon.

2 Product width and spacing

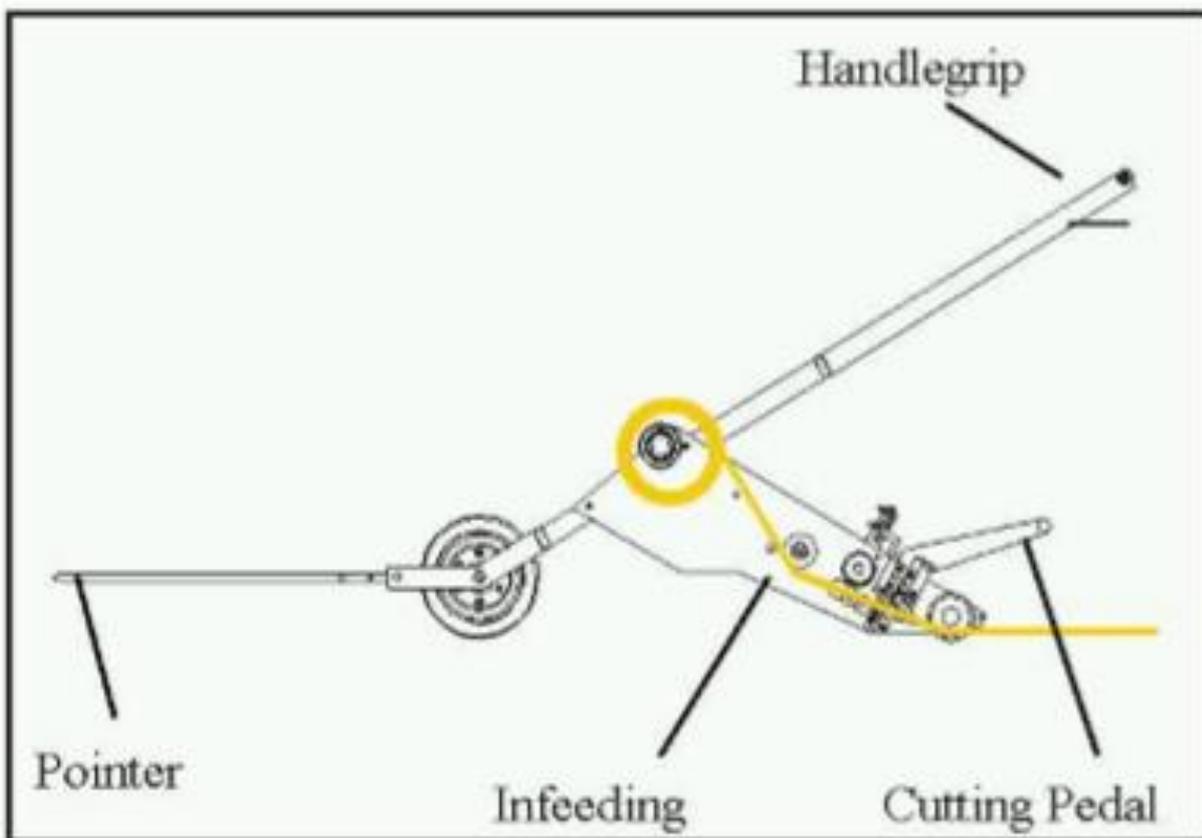

The MTA-2 can be used to apply all 3M™ Stamark™ pavement marking tapes at all standard roll length and up to 30cm wide.

Note: If special roll with larger length are being ordered, the maximum roll diameter must not exceed 50cm, if the material is to be applied with a Manual Tape Applicator.

3 Operation

The MTA-2 is operated by one person.

Note: Pavement Marking Roll changing should be supported by a second person due to the weight of a tape roll in order to avoid extensive workload for a single operator. The application rates depend on the individual application conditions and environment. Typically, tape is being applied at walking speed.

4 Procedure for Adjusting Machine and Tape

Load the tape roll, feed it in to the machine and do the necessary adjustments, as shown in Figure 3 to 8. As soon as these steps are done, the machine is ready for the application.

Caution: Do not activate the cutting knife, while doing adjustments!

5 Tape Application

Determine where the first skip or long line starts by measuring from the last existing skip or reference mark. Adjust the pointer to the pre-marking. Best case is when the pre-marking and the later tape position are in between the wheels of the applicator. If primer is used apply tape exact on primer. For starting the application pull handgrip and watch tape being moved by infeeding-transportation roll. Position tape start at start of pre-marking. Push applicator forward and keep handle grip pulled until tape appears on other side of rubber application roll. Release handle-grip and keep pushing applicator.

For applying Stamark A380 ESD, plasma anti-adhesive rolls have to be added to the MTA-2.

6 Tape Cutting

Bring the applicator to a complete stop. Keep tape under slight tension. Cut tape with one strong and fast movement of foot pedal. Release the pedal slowly. Do not attempt to cut the tape while moving. Cutting the tape in motion will stretch and tear the tape, causing the next line to start off center.

RTC 3 for tamping

7 Tamping

After applying the Pavement Marking Tape tamp with the tape thoroughly with the RTC-3 with a minimum 90kg (200lb.) load.

When using the RTC-3 Roller Tamper Cart:

- Do not twist or turn the tamping device on the tape.
- Make three passes back and forth over each part of the tape
- Move the RTC-3 slowly (4-5 km/h) over the tape Make sure all edges are firmly adhered
- If applying block markings or pedestrian crossings, start in the center of the marking, then work towards the edges to remove trapped air.
- Open road to traffic as soon as tamping is completed

Tamping is most important !

8 Maintenance

Keep all Fasteners Tight

Lubrication: The pivot points and sliding areas should be kept lubricated with light oil.

Cleaning: The silicone application roller wheels and cutting mechanism must be kept clean. Mineral spirits, fuel oil or any other light oil cleaners may be used on the wheels and knives. Check knife blades from time to time to prevent adhesive build-up. Solvents may be used occasionally for difficult cleaning

problems. A spray bottle of cleaner or silicone spray is useful to prevent asphalt and dirt pickup on the wheels and adhesive buildup on the knives during operation.

Caution: Do not use solvents or petroleum products on the silicone application roll when working on new, hot asphalt surfaces. To prevent asphalt buildup around the roller untighten the scraper mounting screws and move the scraper back. Tighten the screws.

9 Adjustments

The Knives are pre-adjusted by the manufacturer to slide across each other with a minimum of friction in a scissors action. Adjustment is needed when the tape is not properly cut. Either the stationary knife or the sliding knife may be adjusted. To adjust the stationary knife, untighten the mounting screws slightly. Turn the setscrews to bring the cutting edge down, and retighten the mounting screws. The same procedure is followed to adjust the sliding knife. Each knife has two cutting edges. The knives may be removed and new cutting edges exposed. The knives may be sharpened after the cutting edges are dull.

10 Trouble Shooting

Tape is not properly cut: The tape will not cut cleanly if cutting is done while the applicator is in motion. If the knife edges are dull or out of alignment, the knives should be sharpened and adjusted. (See Adjustments). Clean adhesives build up from knives. (See Maintenance).

11 MTA-2 – Spare Parts:

Description	3M Order Number
Anti-adhesive rolls	DR-9950-3223-9 (Order via 3M Customer Service)

Other spare parts are available from the company Kötter und Sperber Industrietechnik GmbH Phone: +49 2129 3796843 www.ksimetall.de

12.1 Health and Safety Information

Precautions:

Wear safety shoes and appropriate gloves while handling and using the Manual Tape.

Read all health hazard, precautionary and first aid statements found in the Material Safety Data Sheet (MSDS), and/or product label of chemicals prior to handling or use.

12.2 Disclaimer

THE 3M WARRANTY IS MADE IN LIEU OF ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY IMPLIED WARRANTY ARISING OUT OF A COURSE OF DEALING OR OF PERFORMANCE, CUSTOM OR USAGE OF TRADE.

12.3 Limitation of Liability

Except for the limited remedy stated above, and except where prohibited by law, 3M will not be liable for any loss or damage arising from the Signs or any 3M product, whether direct, indirect, special, incidental or consequential damages (including but not limited to lost profits, business or revenue in any way), regardless of the legal theory asserted including warranty, contract, negligence or strict liability.

13 Other Product Information

Always confirm that you have the most current version of the applicable product bulletin, information folder or other product information from 3M's Website at <http://www.mmm.com/tss>.

14 Guarantee /Liability

3M assumes no responsibility for any injury, loss or damage arising out of the use of a product that is not of our manufacture. Where reference is made in literature to a commercially available product, made by another manufacturer, it shall be the user's responsibility to ascertain the precautionary measures for its use outlined by the manufacturer. Prerequisite for the guarantee is that the tape was processed according the instruction of this technical information folder.
