

The shelf life period for all 3M Commercial Solutions Division chemical products starts at the time the product is manufactured. Manufacturing dates can be found on the side of each bottle/bag. The following charts define the shelf life periods for 3M Commercial Solutions Division chemical products. The following is dependent on products being stored above 40° F (5° C) and below 100° F (37° C) or as stated on the package, and kept in closed containers such as spray bottle or flip top bottles. Products dispensed into an open container such as mop buckets or hand pails should be mixed daily or more often as soil load dictates.
