provided to participants in simple and easy to use format**

Sterilization Assurance Professional Course Introduction

Healthcare in India has made rapid strides in the past few years. One of the key success factors for this improvement has been the collaboration between healthcare professionals across the provider and the supplier space. Through collaboration, best practice sharing, improving technology, India is at the forefront of being one of the better places to be in, across the world, for healthcare.

The collaboration has been limitless, and that is what brings 3M and CSSD professionals together. The Central Sterile Supply Department is integral to a hospital it helps in reducing infection rates. Similarly, 3M provides cutting edge technology to the healthcare fraternity to help them advance their operations. This gives CSSD professionals and 3M loads of reasons to collaborate.

In our continuing efforts to improve the quality or training for CSSD professionals, we are now launching this CSSD Center of Excellence- Sterilization Assurance Professional Course to help young CSSD technicians in the field of sterilization assurance.

3M India invites you to this unique course crafted as per the AAMI & NABH Guidelines to improve the competency and confidence in the field of sterility assurance.
