## Technology for our lives

Did you know that you come across 3M technologies and products more than 100 times a day? Some of them you certainly know whereas others are often invisible elements of modern life. You can find our technologies in more than 55,000 products in numerous areas:

- Health Care
- Manufacturing & Industry
- Safety & Security
- Automotive
- Electronics
- Energy
- Commercial Solutions
- Transportation
- Data and Communications Networks
- Design & Construction
- Mining, Oil & Gas
- Consumer

An overview of all products can be found at:  
[www.3M.com](http://www.3M.com)

## Our responsibility

Every new product that 3M launches into the market must meet fixed criteria for greater sustainability. We use modern science to develop better and more environmentally friendly solutions. Our next big goal is to move to 100 percent renewable electricity in all 3M facilities around the world. We have also officially committed ourselves to this goal and recently joined the global climate initiative RE100. These successes help us to make a contribution to a more sustainable life:

- We have succeeded in reducing our greenhouse gas emissions by 68 % in the last 5 years alone – with simultaneously increased sales.
- Thanks to our technologies, our customers saved 13 million tons of CO<sub>2</sub> equivalent in 2017.
- We have been listed in the Dow Jones Sustainability Index for the last 19 years.

## The meaning of science

For everyone at 3M, science is the engine of all things. But what does the general population think? In our global 3M State-of-Science Index-study, we surveyed 14,000 people from 14 countries: What influence does science have on their lives and what expectations do they have?

- 87 % of the interviewees say that they need science to solve the world's biggest problems
- 47 % expect science to help solve health-related problems
- 71 % hope to get vaccines for chronic diseases
- 66 % expect driverless cars everywhere on the road during their lifetimes
