Film Discs start sharp and
stay sharp, resulting in more
predictable performance,
precision finishes, improved
value and consistent quality.**

3M™ Trizact™ Finesse-it™ abrasive discs remove defects, leaving a consistent finish that is easy to polish out. These discs provide precise finish control and may reduce the amount of time needed to produce a fine finish — which may lead to increased productivity and reduced overall repair costs.

- Features 3M microreplicated abrasive technology on film backing — starts sharp, stays sharp and provides consistent performance throughout the life of the disc
- Available in three grades — A3, A5 and A7 — for use on a variety of topcoats to accommodate most finish and process requirements
- Produces a consistent, fine finish on all clear coats which can result in reduced buffing time
- Designed for quick attachment to rotary buffers or orbital finishing sanders

3M™ Trizact™ Finesse-it™ Film Discs 468LA and 464LA can't be beat for their consistency of finish.
