

Scotch-Brite™ Low Scratch Scour Sponge 3001HEX

Frequently Asked Questions

1. What is the Scotch-Brite™ Low Scratch Scour Sponge 3001HEX?

The Scotch-Brite™ Low Scratch Scour Sponge 3001HEX is a two in one scour sponge featuring proprietary POWER DOTS engineered to power through tough messes with less visible scratches while rinsing clean. Sponge side for wiping. Hexagon shape makes it easy and comfortable to hold.

2. For which applications is the sponge designed to be used?

It is designed to be used to clean a wide variety of surfaces where minimal scratching is desired.

- Kitchen – stainless steel surfaces & appliances, coolers, ceramic tile, countertops, and maintenance equipment
- Bathrooms – sinks, faucets, porcelain, and ceramic
- General – elevator doors, doors, kick plates, desktops, floors, walls, drinking fountains, lockers, ceramic tile, and glass

3. What are the productivity advantages?

- Proprietary POWER DOTS
 - Engineered to quickly and effectively power through tough messes with less visible scratches.
- Rinses clean easily
 - The POWER DOT side is engineered to prevent food particles from becoming trapped, so it rinses clean – fast.
- HEX shape
 - The hexagon shape makes it easy and comfortable to hold while the extra corners clean hard-to-reach areas.
- 2 in 1 tool
 - The POWER DOT side is for scouring and the sponge side is for wiping or carrying solution.

4. What materials are used to make the Scotch-Brite™ Low Scratch Scour Sponge 3001HEX?

- Non-rusting synthetic fibers
- Resin
- Low scratch abrasive minerals
- Urethane foam sponge

5. Is the abrasive mineral different?

No, the low scratch mineral is the same as the abrasive used in the Scotch-Brite™ Low Scratch Scour Pad 2000HEX.

6. Can this sponge be washed through a dishwasher?

Yes.

7. Can this sponge be used on delicate (e.g. Non-stick, ceramic) surfaces?

While it can be used on ceramic and glass surfaces, you should test its impact in an inconspicuous area before use. It is not recommended for non-stick surfaces.

8. Can this sponge be used to clean a flattop griddle?

No, it is not recommended for a flattop griddle.

9. Can this sponge be used on hot surfaces?

Yes, up to 350°F or 177°C.

10. Is the Scotch-Brite™ Low Scratch Scour Sponge 3001HEX HACCP International certified?

Yes, this product is Certified by HACCP International as food-safe and a suitable aid to cleaning in food handling facilities that operate in accordance with an HACCP based food safety program. Please visit <http://haccp-international.com> to learn more about this Certification.

11. What are some common issues observed?

If the Scotch-Brite™ Low Scratch Scour Sponge 3001HEX is run over a sharp edge or surface, the power dots can be torn off. In that case, remove and dispose of the dislodged power dot(s) and continue using the scour sponge until it loses abrasive power.

12. How long will it last?

The Scotch-Brite™ Low Scratch Scour Sponge 3001HEX is designed to retain full scouring power through repeated uses. The exact pad lifetime will vary depending upon use. In general, this pad can be expected to outlast other low scratch scouring pads.

13. When should I discard the sponge?

The sponge should be replaced when the power dots start to wear down or the sponge side starts to be noticeably worn down.

14. How does one dispose of the sponge?

A used and worn out Low Scratch Scour Sponge 3001HEX can be disposed of in the regular trash.
