

Cavilon™
Skin Care Solutions

3M™ Cavilon™ No Sting Barrier Film

**Proven skin
protection
for IV sites.**

The ideal way to protect skin around vascular access sites

Skin damage from Medical Adhesive-Related Skin Injury (MARSI) at vascular access sites can be a significant problem, particularly for those with fragile skin. Although MARSI can be a prevalent and serious complication, it does not need to be an inevitable part of the patient experience. Preparation of the skin and selection of proper adhesives are the first steps to help minimise the risks of skin damage.¹

 **30%**

of oncology patients developed MARSI at their PICC insertion site over the course of two weeks.²

Proven chemistry. Powerful impact.

Effective

- Compatible with chlorhexidine gluconate (CHG)³
- Sterile*
- Can be used for multiple skin protection needs

*Wands and wipes only.

Gentle

- Alcohol-free⁴
- Sting-free⁴

Proven

- Unique formulation supported by 80+ pieces of evidence

Durable

- Fast-drying³
- Waterproof and doesn't wash off³

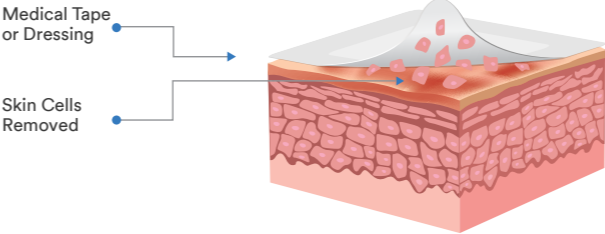

Make 3M™ Cavilon™ No Sting Barrier Film part of your vascular access care process. Visit [3M.com.au/Cavilon](https://www.3M.com.au/Cavilon) and [3M.co.nz/Cavilon](https://www.3M.co.nz/Cavilon) to learn more.

How 3M™ Cavilon™ No Sting Barrier Film works.

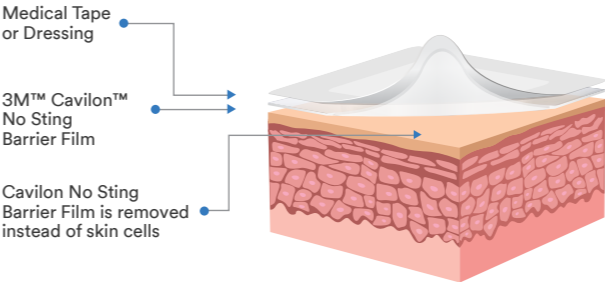

3M™ Cavilon™ No Sting Barrier Film forms a breathable, transparent, protective coating between the skin and the adhesive of the securement dressing, device or tape. When the adhesive product is changed, Cavilon No Sting Barrier Film is removed instead of skin cell layers.³ It also protects skin from moisture, friction and shear.

Peel open packaging

Accepted standards of practice⁵ call for sterile technique and supplies. 3M™ Cavilon™ No Sting Barrier Film is available in easy-to-open, peel-down packaging that allows for aseptic delivery.

Professional standards of practice

The 2016 Infusion Nursing Society Standards of Practice recommend the use of a barrier solution on skin exposed to adhesive dressings to reduce the risk of MARSI.⁵ Making 3M™ Cavilon™ No Sting Barrier Film a routine part of vascular site care helps ensure the skin around the insertion site is protected.
