3M™ Residential Window Films

**Comfort and
protection
— just your
style.**

Protected by 3M™ Window Film

Clearly smart ways to bring beauty and light into your home.

Windows offer beautiful views and an abundance of natural light. But sunlight can create excessive heat and glare, and even fade your precious belongings. With 3M™ Window Films, you can fill your home with light just the way you want.

3M™ Sun Control Window Films are designed to tame the effects of the sun to keep you cool, comfortable and energy efficient. All this, while leaving your views and the look of your home virtually unchanged.

3M™ Low-E Window Films provide increased insulation performance, comfort and savings year-round.

3M™ Safety & Security Window Films help protect your family and property from broken glass caused by break-and-enter crimes, accidents and natural disasters.

3M™ Decorative Films give you the freedom to transform glass surfaces to suit your design needs and wishes, from bold, colorful statements to elegant privacy.

A bright, modern living room with large windows. In the foreground, a blue sofa with orange and patterned pillows sits next to a wooden coffee table. On the coffee table is a large, round, brown ceramic vase filled with green plants and orange flowers, resting on a bed of smooth stones. In the background, there's a dining area with wooden chairs and a kitchen counter with a white orchid. The room is well-lit, suggesting a sunny day.

Stay cool, comfortable and energy efficient.

3M™ Window Films
can help reduce up to

78%

of the sun's heat
coming through
your windows

Get comfortable with saving energy.

3M™ Window Films reduce up to 78% of the sun's heat that comes through windows by reflecting it away from your home. This means a cooler, more comfortable environment for you and your family, all while helping you to save money with lower air conditioning bills.

Protection from UV damage and fading.

Even indoors, your family and belongings are subjected to damaging effects of ultraviolet (UV) rays.

Fabrics, window treatments, wallpaper, natural wood floors, photos, paintings and other valuables can fade when unfiltered sun shines through your windows. 3M™ Window Films are designed to reduce the effects of solar heat and visible light on your furnishings, while blocking up to 99% of the sun's harmful rays, the single largest cause of fading.

According to the Skin Cancer Foundation, window film is one of several recommended safeguards against UV damage.

Reduce glare.

Annoying glare on TVs and computers? Our films significantly reduce glare to help you work, relax and entertain without added eyestrain and discomfort from excessive light.

Year-round insulation and savings.

3M™ Low-E Window Films are designed to retain heat during the winter and cool air during the summer, so you can save on heating and cooling costs all year-round. These films also help provide increased insulation performance, much like upgrading a single-pane to a double-pane window, and a double-pane to a triple-pane window.

How does window film work?

3M™ Sun Control Window Films are designed to reduce the amount of heat transmitted through window glass by reflecting some of the heat back outside.

Stay protected. Keep dangers outside.

Protection where you need it.

From break-and-enter crimes to accidents and natural disasters, 3M™ Safety & Security Window Films provide precious time by helping to deter unwanted individuals from entering your home, protecting family and belongings.

Glass doors and windows are among the most vulnerable points of entry into homes and also pose one of the greatest dangers to your family when the glass is broken. 3M™ Safety & Security Window Films are designed to hold broken glass in place and help prevent flying shards of glass from harming your family and damaging property. You can improve the overall performance of 3M™ Safety & Security Window Films with the addition of 3M™ Impact Protection Attachment Systems.

Customise interior glass for elegance, privacy.

3M™ Decorative Films can transform plain glass, capturing the look of cut or textured glass without the need to purchase new glass.

Give glass a luxurious look or a pop of brilliant color. Create privacy without sacrificing light, wherever you want. From shower doors and bathroom windows to partitions, verandas and doors, you're free to design your space the way you want.

Put 3M Science to work for you.

Proven. Trusted. Guaranteed.

Proven: Our window films resist peeling, bubbling, scratching and abrasion for long-lasting beauty and clarity. With 3M™ Window Films, you can count on continued performance because we push beyond industry standards, testing our films to extremes using the most advanced weathering facilities in the world.

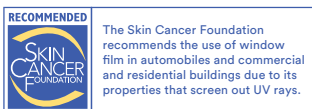

Trusted: 3M was issued the first patent on sun control window film in 1966. Today, there are millions of square feet of 3M™ Window Films installed all around the world.

Guaranteed: When you choose 3M, you choose peace of mind. 3M™ Window Films are backed by a limited lifetime warranty, one of the most comprehensive warranties in the industry.

Hassle-free, certified installation.

Turn to our certified professionals. 3M™ Licensed Installers are experts in helping solve problems like excessive glare, temperature imbalances and issues with fading, privacy, safety and security.

Contact your local 3M™ Licensed Installer for a free estimate. For more information, please call 136 136 or visit us at 3M.com.au/WindowFilm.

Limitation of Liability: Except where prohibited by law, 3M will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted.
