

DIY MOOD BOARD

by Clever Poppy

There is nothing better than some visual inspiration, to keep you motivated and on-task at work. So why not make this DIY Mood Board and pop it up near your desk, so that you can add lots of ideas for your latest project?

All you need is a sheet of card and strong clips. I also covered my card with sticky-back vinyl for an appealing marble look. Now get busy attaching inspo to the board with **Scotch® Magic Tape**. It has a strong adhesive, is easy to tear off the roll and can be written on, making it the perfect partner for this project! See the tips below for varied ways this awesome tape can be used.

Stick samples to the board with Magic Tape

Write notes and thoughts directly on to the Magic Tape

Tear off pieces of tape and use them to make little flags

Turn an envelope into a little storage pocket by tucking the front in, then stick it to the board with Magic Tape

Use Magic Tape to stick on inspiration you've found in magazines
