Some of these links lead to web-based resources that are not product-specific.

1. What is Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector?

Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector are ready-to-use, pre-moistened disposable wipes that clean, degrease and protect non-food contact stainless steel surfaces. These durable wipes are designed to be simple and convenient to use and eliminate the risk of overspray.

2. What are some of the special features and benefits of the Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector?

- Scotchgard™ Protector leaves behind a protective layer on stainless steel surface, helping to reduce cleaning time and effort with each successive cleaning
- Rinse free-no need to rinse after using, reducing a cleaning step
- Non-caustic with a fresh scent
- No Personal Protective Equipment (PPE) required-Not classified as hazardous according to OSHA Hazard Communication Standard, 29 CFR 1910.1200
- NSF A7 Registered-deemed suitable for use on non-food contact surfaces in and around food processing areas
- HACCP International Certified-third party certified as suitable for use in food handling facilities that operate in accordance with a HACCP based food safety program (Food zone classification: SSZ-Splash or Spill Zone)

3. How do I use the Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector?

NOTE: For initial cleaning and optimum surface protection and performance of the wipes, it is recommended to use the wipes and if needed, a Scotch-Brite™ scouring pad to remove any burnt-on grease and stubborn soil.

Step 1: Clean the surface with a fresh wipe. If needed, use a dry towel to remove any excess residue from the surface.

Step 2: Repeat as necessary until the grease is removed and the surface is clean.

Step 3: Dispose of used wipes in trash. Do not reuse wipes.

Step 4: Repeat Steps 1-3 for best results.

Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector can be stored at normal room temperature. Reseal the peel back lid securely to prevent wipes from drying out during storage.

4. What are NSF and HACCP?

NSF stands for National Sanitation Foundation. The National Sanitation Foundation is commonly used as a third-party mark on a voluntary basis. You will find the reference and NSF registration number on the product label. This registration category, however, does not indicate that the product is "food grade" or safe for use on food-contact surfaces. NSF A7 category is for metal polishing cleaning products for use on non-food-contact surfaces in food processing establishments.

www.nsf.org/newsroom_pdf/NF_Registration_Insert_LT_EN_LNF7120412.pdf

HACCP stands for Hazard Analysis and Critical Control Points.

HACCP is an international risk management methodology used by the food and related industries for the control of food safety hazards to an acceptable level.

www.fda.gov/Food/GuidanceRegulation/HACCP/

HACCP International is a leading food science organization specializing in the HACCP food safety methodology and its application within food and related industries. HACCP International operates a world-renowned product certification of food safe equipment, products and services that support the food industry. Certification by HACCP International Certification means that the Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector are "food safe and fit for purpose" to be used for cleaning operations in food processing, preparation and food handling facilities.

5. What type of surfaces can be cleaned with the Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector?

The wipes are ideal for cleaning non-food contact kitchen stainless steel surfaces including:

- Back splashes
- Inside and outside walls of kitchen exhaust hoods
- Refrigerator doors, exterior surfaces of fryers and other kitchen equipment
- Non-food contact counters and surfaces

WIPES AND CLEANING SOLUTION ARE NOT INTENDED FOR USE ON DIRECT FOOD CONTACT SURFACES.

6. How does the Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector work?

Unlike other degreaser products, these wipes have proprietary Scotchgard™ protector which leaves behind a protective layer on the stainless-steel surface, helping to reduce cleaning time and effort with each successive cleaning.

7. Do the Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector have shelf life?

Yes, the recommended shelf life is two years in a sealed, unopened container.

8. What are the recommended storage conditions for the Scotch-Brite™ Kitchen Cleaner & Degreaser Wipes with Scotchgard™ Protector?

The wipes can be stored at normal room temperature. Reseal the peel back lid securely to prevent wipes from drying out during storage.

9. How long does the Scotchgard™ Protector last on the surface?

It will last as long as the wipes are continually being used. Each time the wipe is being used to clean the surface, it leaves behind a protector layer on the surface and each subsequent cleaning builds up the protection layer.

10. Will normal cleaning with a sanitizer remove the protector?

Mostly likely not, but it may depend on the sanitizer product.

11. If a scour pad is used to remove large grease spots, does it remove the protector?

Yes, a scour pad with abrasive particles will remove the protector. A non-scratch/low-scratch pad will remove less of the protector.

12. Do I need to prepare the surface before using the 3M™ Scotch-Brite™ Kitchen Cleaner & Degreaser with Scotchgard™ Protector?

No, however, for optimum surface protection and performance of the wipes, it is recommended to use a Scotch-Brite™ low scratch scouring pad (such as the Power Pad 2000 www.3M.com/foodservice) to remove any burnt-on grease and stubborn soil from the surface prior to using the wipes.

13. Will the Scotchgard™ Protector be removed from the surface if a different cleaning/degreasing product is used?

In lab testing where the surface was cleaned with the wipes and then cleaned with a different degreaser, the degreaser did remove a small amount of the protector. However, when the surface was cleaned again with the wipes, the protective layer was immediately restored with that first cleaning.

14. How often do I need to use the 3M™ Scotch-Brite™ Kitchen Cleaner & Degreaser with Scotchgard™ Protector to obtain best results?

We recommend cleaning 2-3 times per week and monitoring the results. Adjust the frequency based upon your facility's needs. If you currently clean more frequently than 2-3 times per week, follow your current cleaning schedule. Having a clean surface prior to using the wipes will achieve optimum surface protection. It is recommended to use a Scotch-Brite™ scouring pad to remove any burnt-on grease and stubborn soil from the surface prior to using the wipes.

15. Does this product really make it faster to clean grease?

Yes, the Scotchgard™ Protector in the product bonds to stainless steel and other metals, leaving a barrier that prevents grease and other soils from attaching directly to the metal surface. Less effort is required to remove soil from the protected surfaces.

16. Do I need to wear any Personal Protective Equipment when using this product?

3M™ Safety Data Sheet provides the following recommendation: No Personal Protective Equipment (PPE) required-Not classified as hazardous according to OSHA Hazard Communication Standard, 29 CFR 1910.1200. Reference Section 8.2.2 of the Safety Data Sheet for further information.

17. How sustainable are these wipes?

Please refer to our sustainability bulletin ([link](#)). This product enables safe and healthy environments, responsible property maintenance, and protects and reduces water use.

18. How durable are these wipes?

These wipes were designed to be robust over a single use. Lab testing has not shown tearing or pilling with hard use.

19. Can I reuse these wipes?

No, these wipes are designed for single use. Once used, they may be disposed in regular kitchen trash.

20. If the wipes dry out, can I just add water to make them work again?

No, adding water may dilute cleaning efficacy of the wipes.

21. Can I use these to clean my griddle?

No, wipes and cleaning solution are not intended for use on direct food contact surfaces.

22. The wipes leave streaks, how do I get rid of them?

Wipe the surface with a dry paper or cloth towel.

23. Do I need to rinse off the cleaning solution from the surface when done?

No, rinsing off the cleaning solution will not provide the Scotchgard™ Protector property to the surfaces that just have been cleaned.

NOTE: The Scotchgard™ Protector is safe for non-food contact surfaces.

24. How much square footage will one wipe clean, degrease and protect?

On average, one wipe will clean, degrease and protect approximately 50 square feet of stainless steel with regular use*

*Individual results may vary depending on grease load and cleaning frequency

25. What if I use Scotch-Brite™ Kitchen Cleaner and Degreaser with Scotchgard™ Protector on direct food contact surfaces?

Scotch-Brite™ Kitchen Cleaner and Degreaser with Scotchgard™ Protector is not a registered product for direct food contact use. An EPA registered sanitizer should be used on the direct food contact surface if any other product contacts that surface, and always as a final step before placing food on the surface. Facilities should consult all applicable local and federal guidelines to ensure their process for direct food contact cleaning, disinfecting, and sanitizing complies with the required procedures.

26. Can the wipes be used to remove grease and oil from other stainless-steel surfaces (ex: elevator doors, escalators, fixtures, etc.)?

Yes, the wipe will effectively remove grease and oil from these surfaces.

27. Are the Scotch-Brite™ Kitchen Cleaner and Degreaser with Scotchgard™ Protector Wipes compatible for use with the 3M™ Stainless Steel Cleaner and Protector with Scotchgard™?

Yes, the products may be used without adverse effects in the same vicinity and on the same surfaces. Scotch-Brite™ Kitchen Cleaner and Degreaser with Scotchgard™ Protector Wipes are an appropriate product to remove oil-based polishes and cleaners from stainless steel surfaces while imparting Scotchgard™ protection. 3M™ Stainless Steel Cleaner and Protector with Scotchgard™ can then be used on architectural features for streak free cleaning and protecting of those surfaces.

Health and Safety

CAUTION

When handling any chemical products, read the manufacturers' container labels and the Safety Data Sheets (SDS) for important health, safety and environmental information. To obtain SDS sheets for 3M products go to 3M.com/SDS, or by mail or in case of an emergency, call 1-888-364-3577 or 1-651-737-6501.

When using any equipment, always follow the manufacturers' instructions for safe operation.

Technical Information

Technical information and data, recommendations, and other statements provided by 3M are based on information, tests, or experience which 3M believes to be reliable, but the accuracy or completeness of such information is not guaranteed. Such technical information and data are intended for persons with knowledge and technical skills sufficient to assess and apply their own informed judgment to the information. The typical values shown should not be used for the purpose of specification limits. If you have questions about this Product, contact the Technical Service Department at 1-800-698-4595.

Product Use

Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. Given the variety of factors that can affect the use and performance of a 3M product, user is solely responsible for evaluating the 3M product and determining whether it is fit for a particular purpose and suitable for user's method of application.
