

3M™ 360 Encompass™ Audit Expert System

- Supports compliance through custom edits, second-level reviews and audit processes at the point of coding
- Provides auditing and compliance processes within the 3M™ 360 Encompass System™ workflow
- Produces solutions that identify and address organizational coding risks

3M's single platform advantage

3M™ 360 Encompass™ Audit Expert System eliminates the need for additional tools by integrating auditing and compliance procedures into the 3M coding system that users are already familiar with. You can now reduce or remove manual systems and processes previously used to manage audit and compliance activities. Leaders can leverage a single platform for coding accuracy throughout the revenue cycle and create better coordination and collaboration between revenue cycle staff.

Compliance simplified: More power. Easier to use.

3M™ 360 Encompass™ Audit Expert System consists of two modules: **Inpatient Prebill Review** and **Code Audit**. Inpatient Prebill Review simplifies the prebilling process by identifying potential coding issues at the point of coding and can automatically initiate a second-level review as needed.

Code Audit simplifies the audit process for focused, batch-driven audits. Both modules are streamlined within the **3M™ 360 Encompass™ System** workflow, leveraging the 3M 360 Encompass coding process users are already accustomed to using.

Depending on your site's auditing and compliance challenges and goals, you may purchase either one or both of these versatile modules to fit your purposes and needs.

Code Audit

Code Audit offers a streamlined workflow to develop focused or randomized batch-driven audits based on organizational needs. Organizations can leverage the single platform and workflow of 3M 360 Encompass to audit coding accuracy, review DRG assignments and monitor other trends throughout the revenue cycle. Auditors and compliance departments can easily create focused, batch-driven reviews, providing audit validations throughout the organization.

Auditors can also reduce time spent with "homegrown" spreadsheets or manual systems, allowing for a more efficient, streamlined and compliant method for managing the auditing process.

Code Audit features:

- Batch-audit capabilities for focused audits within the 3M 360 Encompass platform
- Ability to review documentation and code sets used to create the patient bill
- Intuitive and visual workflows for more detailed communication between auditors and the coders
- Robust management dashboards and reports that display audit progress, metrics and other key information

3M™ 360 Encompass™ Audit Expert System

Inpatient Prebill Review (Pre-release)

Inpatient Prebill Review allows coders to resolve issues at the point of coding. The module lets organizations create and deploy customized, actionable coding edits specific to their needs, addressing risk areas at the point of coding within 3M 360 Encompass. The module can also automatically route claims (when specified) for secondary review.

The flexibility and intuitive design of Inpatient Prebill Review enables facilities to address their unique coding and compliance challenges, leading to more accurate and complete patient claims.

Inpatient Prebill Review features:

- Actionable edits based on the organization's unique coding risks
- Edit-driven, second-level reviews
- Visual identification of coding changes and communications between auditors and coders
- Reports that provide trending, tracking and reporting on key organizational metrics

The solution: Simplify your audit and compliance processes

By using the same powerful 3M 360 Encompass platform for coding and auditing, you gain efficiencies, lose redundant effort and rework, and unite your coding and auditing teams in a more collaborative working environment. Whether your organization's auditing and compliance goals are addressed at the point of coding or through an audit validation, 3M 360 Encompass Audit Expert System provides simple, streamlined solutions for your compliance needs.
