# 3M™ Scott™ RAS - Asbestos Airline Respirator

## Description

The 3M™ Scott™ RAS (Respiratory Airline Supply) Asbestos airline breathing apparatus set is a positive pressure set that provides the highest levels of breathing protection. The tempest demand valve provides a positive pressure inside the facemask, which leads to an assigned protection factor of 2000 (whilst the unit is connected to an air supply) making the apparatus ideal for areas with high levels of contamination.

The facemask is also fitted with a negative pressure filter to allow entry and egress to the working area where the challenge will be lower without the necessity to be connected to an airline.

The wipe clean webbing provides a bandolier style harness that has a smooth surface which can reduce the trapping of asbestos fibres and leads to improved decontamination of the set after use.

The inline particulate filter ensures that any fibres that may be present when the product is connected to the airline are removed from the breathing circuit.

The RAS Asbestos is also available in a new kit form whereby the customer can purchase one item that contains the apparatus, the facemask and a P3 filter. This is presented in a black hard carry case that helps protect it when in storage and transport.

## Product highlights

- ▶ Assigned protection factor of 2000
- ▶ Highest level of breathing protection
- ▶ PU coated polyester webbing
- ▶ Wipe clean harness
- ▶ Improved decontamination
- ▶ Inline particulate filter
- ▶ Approved and CE marked to EN 14593-1:2005 and AS/NZS 1716:2012
- ▶ Facemask fitted filter for entry and egress

# 3M™ Scott™ RAS (Respiratory Airline Supply) - Asbestos

## Ordering information

Part number	Description
2024492	3M™ Scott™ RAS Asbestos kit
2023447	3M™ Scott™ RAS Asbestos (less facemask)
